Tobacco Quota Buyout

Jasper Womach

Resources, Science, and Industry Division

Summary

Tobacco quota buyout legislation (Title VI of P.L. 108-357 (H.R. 4520)) terminates U.S. tobacco farm price support (through nonrecourse loans) and domestic production controls (through marketing quotas) after the 2004 crop year. An assessment on tobacco product manufacturers and importers is to generate about $9.6 billion over 10 years for compensatory payments to tobacco quota owners and active tobacco producers. Beginning with the 2005 crop, there will be no restrictions on who can grow and market tobacco, where it can be grown, and the amount that can be grown and marketed. (This report will not be updated.)

Tobacco quota buyout legislation (P.L. 108-357, Title VI, Fair and Equitable Tobacco Reform Act of 2004) eliminates federal farm price support for tobacco at the end of the 2004 crop year. Tobacco quota owners and active producers will be paid about $9.6 billion as compensation for lost rents and to aid in the transition to a free market system. The payment rate to quota owners is $7 per lb. on 2002 basic quota; the payment rate to active producers is $3 per lb. on 2002 effective quota. Payments are to be made in equal annual installments for 10 years. Farmers wanting faster payouts can assign their quota buyout contracts to private financial institutions and receive discounted lump sum payments. Money to pay for the buyout will come from new assessments on tobacco product manufacturers and importers.

After about 65 years of supply control and price support, farmers will not be constrained on who can produce tobacco, where it can be grown, how much can be marketed, or how low the farm price can go. Tobacco economists anticipate a rapid consolidation of tobacco production onto substantially fewer but larger farms located in the most economical regions. Total U.S. tobacco production is expected to increase.

---

The tobacco quota buyout campaign gained momentum after farmers were joined by some anti-smoking and public health advocates, as well as the Philip Morris USA cigarette manufacturing company, seeking new authority for the Food and Drug Administration (FDA) to regulate tobacco products. The FDA authority was introduced as S. 2461 (DeWine-Kennedy) and H.R. 4433 (Tom Davis-Waxman) in the 108th Congress. Legislative conferees on H.R. 4520 did not adopt the FDA provisions, though the provisions had been included in the Senate version of the bill. There was opposition from some cigarette manufacturers to the FDA provisions, and from those in Congress opposed to giving the federal government expanded regulatory authority over private businesses.

**Payments to Tobacco Quota Holders**

A tobacco quota holder is defined as the owner (as of October 22, 2004) of a farm with a basic tobacco marketing quota or tobacco acreage allotment for the 2004 marketing year. The quota holder will receive a contract obligating the USDA’s Commodity Credit Corporation (CCC) to pay $7 per lb. on the basic quota level established for the farm for the 2002 marketing year. The payments are to be made in 10 equal annual installments of $0.70 per lb. For those kinds of tobacco where the farm quota is specified in acres, a 2002 poundage equivalent is calculated using the county average yield for the 2001-2003 crop years.

In 2002 the national basic quota amounted to about 959 million pounds. So, payments to quota owners could amount to $6.7 billion. According to USDA’s Farm Service Agency (FSA) data, there were about 415,750 tobacco quota owners in 1999. There were 56,977 farms producing tobacco in 2002, according to the Census of Agriculture, and almost all of these farm operators also were owners of quota. Thus, approximately 358,000 nonoperator landlords will receive quota buyout payments along with the nearly 57,000 farm operators under the new law.

**Payments to Producers of Quota Tobacco**

Active tobacco producers will receive a contract obligating the CCC to pay $3 per lb. on the effective farm marketing quota for the 2002 marketing year. For those kinds of tobacco where the effective farm quota is specified in acres, a 2002 poundage equivalent is calculated using the average yield on the farm for the 2001-2003 crop years. A farmer who produced quota tobacco in each of the 2002-2004 marketing years will receive the full $3 per lb. payment. The payments are to be made in 10 equal annual installments of $0.30 per lb. For each of the three base years the farmer did not produce tobacco, the payment is reduced by one-third.

In 2002 the national effective quota amounted to about 970 million pounds. Hence, payments to quota owners could amount to $2.9 billion, which will be divided among approximately 57,000 producers.

**Obtaining Lump Sum Payments**

Provisions are made in the law allowing contract payment recipients to assign the annual payments to financial institutions. This enables financial institutions to make
lump sum payments to the quota holders and active producers. Presumably, the financial institutions will discount the contracts to cover their costs of borrowing as well as administrative overhead. CCC then would make the annual payments to the financial institutions to which the contracts have been assigned. The administrative process of determining the identity of recipients and their individual payments is complex and could delay implementation.

**Assessments on Tobacco Product Manufacturers and Importers**

The cost of the tobacco buyout is to be covered by assessments on tobacco product manufacturers and tobacco product importers. The assessments will be collected by the CCC on a quarterly basis during each of the 10 fiscal years from FY2005 through FY2014. The assessments began with the calendar quarter ending December 31, 2004. The amount to be collected each fiscal year is the amount needed to cover the year’s expenditures associated with the quota buyout program — about $1 billion per year.

The assessments are apportioned according to the gross domestic volume share of the market held by each class of tobacco product. The initial share by class for FY2005 is as follows: cigarettes, 96.331%; cigars, 2.783%; snuff, 0.539%; roll-your-own tobacco, 0.171%; chewing tobacco, 0.111%; pipe tobacco, 0.066%. Each year the allocation will be changed to mirror changes in market shares. Each manufacturer and importer’s pro rata share of the domestic market becomes its contribution to the total collection. Assessments and collections are done quarterly. If domestic cigarette sales remain constant at the 2004 level of 19.5 billion packs, the annual buyout program cost will amount to about 5¢ per pack.

Subsequent to the 1998 Master Settlement Agreement between the major cigarette manufacturers and the State Attorneys General, the manufacturers signed a Phase II agreement to pay $5.15 billion to the tobacco producing states. The payments were to be made over a 12-year period corresponding to a declining scale from 1999 through 2010. An estimated $2.6 billion in remaining Phase II obligations are now eliminated by the tobacco quota buyout legislation. The states most adversely affected by the loss of Phase II payments are Pennsylvania and Maryland (at about $11 million and $16 million respectively) because these states will not receive quota buyout payments. They receive no buyout payments because many years ago the tobacco producers decided to forgo the federal tobacco subsidy program.3

**Disposal of Loan Pool Stocks**

Farm market prices for U.S.-grown tobacco in 2005 and subsequent years are expected to fall below the mandatory support levels that applied to 2004 and previous crops. Therefore, tobacco previously put under price support loan (called loan pool stocks) likely will not be sold at prices high enough to cover the loan principal plus

---

interest. It also is possible that no-net-cost funds previously collected from producers and leaf buyers will not be adequate to cover the losses. The buyout legislation anticipates this development and specifies that such losses in excess of funds previously set aside in the no-net-cost accounts are to be covered by money from the Tobacco Trust Fund. (A detailed explanation of the previous support program is in CRS Report 95-129, *Tobacco Price Support: An Overview of the Program*.)

**Administration of the Tobacco Quota Buyout Program**

The tobacco quota buyout program will be administered by the Farm Service Agency through the same network of county offices that administered the tobacco price support program and the emergency Tobacco Loss Payments. The records in these county offices will be used to determine the distribution of payments. Also, quota holders and producers will be required to complete applications with sufficient information to demonstrate each applicant’s rightful claim to payments.

The CCC will establish a revolving Tobacco Trust Fund to receive tobacco product assessments and to make quota owner and producer payments. The Tobacco Trust Fund also will reimburse the CCC for losses associated with the disposal of existing association loan pool stocks and inventories connected to prior price support activities. Total expenditures from the Trust Fund are limited to $10.14 billion and must be completed by January 1, 2015.

## Summary of the Tobacco Quota Buyout Legislation

### Fair and Equitable Tobacco Reform Act of 2004, Title VI of P.L. 108-357
Adopted by Congress as Title VI of H.R. 4520, signed into law October 22, 2004.

### Total Payments and Other Spending
Total payments to quota owners and producers, as well as costs related to disposition of loan pool stocks, are limited to $10.14 billion. There is no additional spending for community assistance or other activities. [Sec. 627]

### Funding Sources
Payments to quota owners and active producers, and expenses related to disposal of existing price support loan stocks, are from a Tobacco Trust Fund created in the CCC. Trust Fund revenues are from quarterly assessments on tobacco product manufacturers and importers. Cigarettes pay 96.331% in the first year, other tobacco products share the remainder. [Sec. 625] Cigarette manufacturer Phase II producer payment obligations of about $2.6 billion for 2005-2010 end under provisions of the Phase II agreement.

### Payment Timing
Payments to quota owners and producers are made in 10 equal annual installments from FY2005 through FY2014. [Sec. 622(e) and 623(d)] Advance payment options likely will be available to owners and producers from financial institutions to which they assign their contracts. [Sec. 624(e)]

### Quota Owner Payments
Quota owners (numbering about 416,000, including about 57,000 active producers and 359,000 landlords) as of the date of enactment are to be paid $7 per lb. on marketing year 2002 basic quota, divided into 10 equal payments of 70¢ per pound. [Sec. 622] (Estimated cost = $6.7 billion)

### Active Producer Payments
Active producers (numbering about 57,000), who raised tobacco in 2002, 2003, or 2004, are to be paid $3 per lb. on 2002 marketing year effective quota, divided into 10 annual installments of 30¢ per pound. Payments are reduced by 1/3 for each year tobacco was not grown by the producer. [Sec. 623] (Estimated cost = $2.9 billion. Nearly all producers own some quota.)

### Assignment of Payments
Holders of contracts to receive payments may assign them to financial institutions. The CCC will then make annual payments to the financial institutions. [Sec. 624(e)]

### Production Controls and Restrictions
Marketing quotas and acreage allotments are terminated. [Sec. 611 and 612] There will be no restrictions on who can produce tobacco in 2005 and future years, or where it can be produced. Production likely will be consolidated onto fewer and larger farms in the most economical regions. Total production is expected to increase.
**Price Support**
Price support loans and no-net-cost assessments are terminated. [Sec. 612] Market prices are expected to decline by 20-30%.

**Disposal of Loan Pool Stocks**
Loan pool stocks acquired under previous price support operations will be sold by price stabilization cooperatives and the CCC. Losses in excess of no-net-cost account funds are to be reimbursed from the Tobacco Trust Fund. [Sec. 641] An estimated $517 million should be available for this purpose from the Trust Fund after subtracting buyout expenditures from total funds.

**Tobacco Inspection and Grading**
Mandatory inspection and grading of imported tobacco is eliminated. [Sec. 611(b)] Inspection and grading of domestic tobacco will continue at designated auction markets as long as 2/3 of the growers selling at the market the previous year vote their approval.
