

An outline map of California is shown in the background. The western portion of the map is filled with a solid dark blue color, while the rest of the map is white with a thin grey border. The text is overlaid on the map.

Handgun Commerce in California 2000

A Report from the Violence Prevention Research Program

The Violence Prevention Research Program is located at the University of California, Davis. Its work addresses the causes, nature, and prevention of violence.

The Handgun Commerce in California project is funded in part by a grant from The David & Lucile Packard Foundation.

This report was prepared by VPRP staff members Barbara Claire, Kevin Grassel, Vanessa McHenry, Donna Valadez, Michael Romero, Garen Wintemute and Mona Wright. We are grateful for the technical assistance provided by Mr. Randy Rossi, Chief, Firearms Branch, California Department of Justice, and his staff, and by Mr. Chris Hadley of the Sacramento Police Department.

Executive Summary

This report provides basic information on handgun commerce in California for the year 2000. Its principal focus is on the handguns sold that year. It also contains information on handgun purchasers, denied sales, handgun manufacturers, and commercial firearm licensees such as gun dealers and pawnbrokers. Its purpose is to inform the public, policy makers, and others about commerce in an important consumer product—the handgun—which has legitimate uses but is also frequently involved in criminal and self-inflicted violence.

Handgun Commerce in California, 2000 relies largely on information in the Dealer's Record of Sales (DROS) archive that is maintained by the California Department of Justice. A DROS record is created each time an individual seeks to purchase a new or used handgun from a firearm licensee. The record, which contains basic identifying information on that individual and on the handgun he or she wishes to purchase, is sent to the Department of Justice for review. A small percentage of sales are denied by the Department of Justice after a mandatory background check; records for both approved and denied sales are retained by the Department.

This report does not contain information on all handgun sales in California. Some sales between private individuals are not included because there is no record of them: State law requires that nearly all such private-party transfers be routed through a firearm licensee so that a DROS record can be made and a background check can be conducted, but compliance is less than perfect. We have also excluded transactions involving the operations of the Department of Justice itself and certain other transactions. As a result of those exclusions, the sales tabulations here do not agree exactly with those provided by the Department of Justice.

Handgun Sales

A total of 193,489 handguns were sold in California in 2000, approximately 8.4 sales per 1,000 persons ages 21 and older. Handgun sales fluctuated little from month to month until the end of the year, then increased considerably. Sales ranged from a low of 13,085 in April to a high of 32,979 in December.

While the number of handgun sales was highest in urban counties (Los Angeles County ranked first with 40,824 sales), the rate of sales on a per-capita

Executive Summary

basis was highest in predominantly rural counties (Trinity County ranked first with 25.1 sales per 1,000 persons ages 21 and older).

Sixty-eight percent of handguns sold in California in 2000 were semiautomatic pistols. Large-caliber handguns were the most common (48.6%), and most handguns had long barrels (77.5%). Nearly two-thirds of handguns were manufactured in the United States.

Males bought 92.2% of handguns, and 72.9% were bought by persons ages 25–34, 35–44, or 45–54.

Sales at gun shows accounted for 2.8% of all handgun sales. Private party transfers accounted for 8.9% of sales.

Handgun Manufacturers

While handguns from 639 manufacturers were sold in California in 2000, the top 20 manufacturers accounted for 84.1% of all sales. Of these manufacturers, 11 are primarily located in the United States. Several of the remaining top manufacturers operate in the U.S. through subsidiaries. Overall, Smith & Wesson ranked first in sales (34,819 handguns, 18.0%), followed by Sturm, Ruger (28,181 handguns, 14.6%), and Glock, a manufacturer based in Austria (19,667 handguns, 10.2%).

Smith & Wesson was the leading manufacturer of revolvers sold in California (21,597 revolvers, 36.9%), and Glock was the largest manufacturer of semiautomatic pistols sold in the state (19,667 pistols, 14.9%)

Smith & Wesson was the largest manufacturer of large-caliber handguns (18,118 handguns, 19.3%) and medium-caliber handguns (13,222 handguns, 20.5%) sold in California. Sturm, Ruger was the largest manufacturer of small-caliber handguns (7,468 handguns, 22.6%).

Two of the top 20 manufacturers are headquartered in Southern California; Bryco Arms/Jennings Firearms (Costa Mesa) and Phoenix Arms (Ontario) together accounted for 2,682 (1.4%) of the handguns sold in California.

There were two new manufacturers on the top 20 list for 2000; Kel-Tec

Executive Summary

(Cocoa, Florida) and Magnum Research (Minneapolis, Minnesota) together accounted for 3,362 (1.7%) of the handguns sold in California.

Denied Sales

In January 2000, California limited handgun purchases from commercial firearm licensees to one per person in any 30-day period (private-party transfers are exempted). The law also prohibits firearm purchases by any person who has been convicted of a felony or violent misdemeanor, is an unlawful user of or is addicted to a controlled substance, is an illegal alien, is subject to a domestic violence restraining order, and certain others.

There were 3,632 denied sales in 2000: 1,621 prohibited-person denials and 2,011 one gun a month denials. This represents approximately two denied sales for every 100 handguns sold. A total of 3,444 individuals attempted to purchase handguns but were denied; 95.1% of these individuals were denied once, and the remainder were linked to as many as seven denied sales.

Most handguns involved in both one gun a month and prohibited-person denied sales were pistols, three-fourths had long barrels, and nearly two-thirds were of U.S. origin. Handguns denied to prohibited persons were more likely to be of medium or large caliber (43.1% medium, 43.0% large) than were handguns in one gun a month denials (28.9% medium, 47.8% large).

The majority (94.1%) of both groups of denied sales were to males. Nearly half (46.2%) of the prohibited-person denials were for persons between 21 and 34 years of age compared with 23.3% of the one gun a month denials.

The list of manufacturers most frequently involved in denied sales generally resembled the list of manufacturers of handguns that were most frequently sold.

Among prohibited-person denials, 76.8% were for prior criminal convictions: 40.3% for felonies and 36.5% for misdemeanors. Drug-related offenses were the most common felony convictions (29.6%). Nearly all the misdemeanor convictions (83.1%) were for assault.

Handgun Purchasers

A total of 134,227 Californians purchased these 193,489 handguns. The

Executive Summary

vast majority (90.9%) of the handgun purchasers were male, and almost half (50.4%) were ages 25-34 or 35-44. Most of the purchasers (77.3%) bought only one handgun; the 22.7% of purchasers who bought more than one handgun accounted for 46.4% of all handguns sold.

A total of 103,743 people bought one handgun in 2000. Most of these handgun purchasers were male (89.9%), and they were most commonly ages 25-34 (26.3%). Another 30,484 people bought at least two and as many as 225 handguns in 2000; they bought 89,746 handguns in total. Most of these purchasers were male (94.3%), and they were most commonly ages 35-44 (26.3%).

There were 2,031 people who bought more than five handguns in 2000. They accounted for only 1.5% of all purchasers but bought 9.5% of all handguns sold: a total of 18,383 handguns.

Firearm Licensees

A total of 1,936 firearm licensees reported handgun sales in 2000, approximately 8.4 licensees per 100,000 persons ages 21 and older. The majority of licensees reporting sales were in the urban counties of Southern California and the San Francisco Bay area (Los Angeles County ranked first with 273 licensees), but the highest numbers of licensees on a per-capita basis were found in rural counties (Alpine County ranked first with 115.5 licensees per 1,000 persons ages 21 and older).

Gun dealers accounted for 86.2% of licensees and 86.7% of handgun sales; pawnbrokers accounted for 11.7% of licensees and 9.8% of handgun sales. (Additional sales were reported by non-retailer licensees.)

The 43.2% of all retailers who sold fewer than ten handguns accounted for just 1.6% of handgun sales by retailers. The 94 retailers selling 500 or more handguns accounted for 4.9% of all retailers but 52.1% of all handgun sales by retailers.

Of the retailers with the largest number of denied sales, about half were also among those with the largest number of handgun sales. Denied sales for these large-volume retailers ranged from 1.4 to 6.4 for every 100 handguns sold.

Introduction

This report provides basic information on handgun commerce in California for the year 2000. Its principal focus is on the handguns sold that year. It also contains information on handgun purchasers, denied sales, handgun manufacturers, and commercial firearm licensees such as gun dealers and pawnbrokers. Its purpose is to inform the public, policy makers, and others about commerce in an important consumer product—the handgun—which has legitimate uses but is also frequently involved in criminal and self-inflicted violence.

Handgun Commerce in California, 2000 relies largely on information in the Dealer's Record of Sale (DROS) archive that is maintained by the California Department of Justice. A DROS record is created each time an individual seeks to purchase a new or used handgun from a firearm licensee. The record, which contains basic identifying information on that individual and on the handgun he or she wishes to purchase, is sent to the Department of Justice for review. A small percentage of sales are denied by the Department of Justice after a mandatory background check; records for both approved and denied sales are retained by the Department.

This report does not contain information on all handgun sales in California. Some sales between private individuals are not included because there is no record of them: State law requires that nearly all such private-party transfers be routed through a firearm licensee so that a DROS record can be made and a background check can be conducted, but compliance is less than perfect. We have also excluded transactions involving the operations of the Department of Justice itself and certain other transactions. As a result of those exclusions, the sales tabulations here do not agree exactly with those provided by the Department of Justice.

With occasional exceptions, we have elected to use the information in the DROS records as originally provided by the submitting licensees, without reviewing the records and correcting errors. Some licensees did not supply complete data, particularly for handgun caliber and barrel length, and purchaser age and sex. As a result, table subtotals may not correspond exactly with totals. Information on missing data is given in Appendix III.

Introduction

ORGANIZATION OF THE REPORT

This report is intended to be used as a reference, and each section is designed to stand alone.

The first section of *Handgun Commerce in California, 2000* illustrates how handgun sales were distributed through the state geographically and by month during the year. It then presents information on the number of handguns sold by handgun type, caliber, barrel length, and country of origin. New analyses for the 2000 report focus on sales at gun shows and sales between private parties. For all handguns and for each of these subgroups of handguns, this section also presents the distribution by age and sex of the persons to whom the handguns were sold. This section focuses on handgun sales; in the tables on age and sex, individuals who purchased more than one handgun are included once for each handgun they purchased. Handguns that were sold more than once in 2000 are included once for each time they were sold.

For each of the 20 manufacturers associated with the largest number of handgun sales, the second section presents a separate tabulation of the characteristics of its handguns that were sold in 2000 and gives the company's location and market share.

The third section presents information on denied sales, beginning with data on handgun characteristics and the age and sex of persons involved. Separate results are presented for prohibited-person denials and administrative denials made under California's new law restricting handgun purchases to one in any 30-day period (the "one gun a month" law). Tables rank individual manufacturers by their number of denied sales and list the reasons for which sales were denied.

The fourth section presents information on handgun purchasers. The number of handguns purchased and distributions by age and sex are presented twice: for all purchasers together and separately for purchasers of one handgun and purchasers of more than one handgun. In the data used for preparing these tables, which focus on individual persons, each purchaser was included only once, regardless of the number of handguns he or she purchased.

Introduction

The final section contains information on firearm licensees. Maps display their geographic distribution. Tables present the number of licensees by type of license and, for licensed retailers (gun dealers and pawn brokers), give more detail on the characteristics of handguns sold and volume of sales. Additional tables list the licensees with the most sales and those with the most denied sales; in the latter case, denied sales are compared to overall sales volume.

Appendix I presents tables designed to allow readers to compare subpopulations of handguns by type of sale and other characteristics. It also includes comparison tables for leading manufacturers. Appendix II presents abbreviated handgun commerce data for individual counties and for all cities with a total population greater than 100,000 persons in 2000.

Appendix III contains technical notes, and Appendix IV lists additional sources of information.

BACKGROUND INFORMATION

Handgun Characteristics

Handguns are of three principal types: semiautomatic pistols, revolvers, and derringers.

A semiautomatic pistol (referred to hereafter simply as a pistol) contains its ammunition in a detachable magazine; when a pistol is fired, some of the explosive force is used to load the next round of ammunition into firing position automatically. These are not fully automatic guns, also known as machine guns, which both load and fire automatically as long as the trigger is pulled and held depressed. For a semiautomatic pistol, each pulling of the trigger fires just one round of ammunition. Pistols typically hold six to ten rounds of ammunition, but may hold much more. (See full-size illustration on page 7.)

A Typical Semiautomatic Pistol

Introduction

A Typical Revolver

A revolver contains its ammunition in a cylinder that rotates, bringing a new round of ammunition into firing position, as the user depresses the trigger or pulls back on the hammer. Revolvers typically hold five or six rounds of ammunition. (See full-size illustration on page 8.)

A derringer is a small handgun that typically has two barrels, each of which is loaded by the user with a single round of ammunition. (See full-size illustration on page 9.)

A Typical Derringer

A significant proportion (20% to 30% in recent years) of the handguns that enter the consumer market in the United States are manufactured overseas. These imported handguns must meet a number of design and safety standards, including a minimum permissible height and length for pistols and a minimum barrel length for revolvers. In 2000, these standards did not apply to handguns made in the United States.

Handgun ammunition is produced in many sizes, or calibers; most handguns are designed to fire ammunition of just one caliber. The numeral in an ammunition caliber designation refers to the approximate diameter of the bullet, measured in inches in the American system (for example, .22, .45) and otherwise in millimeters (for example, 9mm, 10mm). Calibers

are generally grouped into three classes—small, medium, and large—based loosely on bullet size and speed. (See full-size illustration on page 10.)

Selling Handguns

In 2000, California for the first time limited the number of handguns that an individual could purchase from commercial firearm licensees to no more than one in any 30-day period, with certain specified exceptions.

Persons who sell firearms as a business in California must have a federal firearms license, a state firearms license, and in many cases local certification as well. Retaining licensure requires compliance with all applicable laws and regulations, and licensees are inspected periodically to verify their compliance. As of September 1999, according to the federal Bureau of Alcohol, Tobacco and Firearms, there were 6,406 federal firearm licensees in California, including 4,005 gun dealers and 286 pawnbrokers. Not all licensees sell guns, however; as this report relies on information taken from sales records, licensees having no handgun sales in 2000 are not included.

One of the first steps in a handgun sale by a licensed seller is the submission of a Dealer's Record of Sale (DROS) form to the Department of Justice. There is a mandatory ten-day waiting period, after the DROS record is submitted, before the seller may transfer the gun to the prospective purchaser. This allows the Department to perform a required background check to verify that the individual seeking to purchase the gun is not prohibited from doing so. Except for transactions between immediate family members (parent to child, grandparent to grandchild) a private party may not sell a firearm directly to another private party. Such transfers must be routed through a firearm licensee, who retains the firearm during the mandatory waiting period and initiates the background check. Many, and perhaps most, private-party transfers are not conducted in compliance with this requirement. Private-party transactions are exempt from the one handgun per 30 days restriction.

Introduction

Most handgun purchasers in California are required to pass a safety course. Both state and federal laws prohibit the purchase (or possession) of firearms by felons, persons under felony indictment, persons convicted of misdemeanor domestic violence offenses or subject to domestic violence restraining orders, persons adjudicated mentally defective, addicts or unlawful users of controlled substances, illegal aliens, and certain others. Firearm licensees cannot sell handguns to persons less than 21 years of age. Since 1991, California law has also prohibited the purchase or possession of firearms by persons convicted of certain violent misdemeanors within the preceding ten years. California also prohibits the purchase or possession of firearms by persons who have been admitted to a mental health facility under certain specific circumstances within the preceding five years. Approximately two percent of handgun sales are denied after background checks have been performed.

Handgun Sales

Several characteristics of handguns sold by firearm licensees are recorded in the California Dealer's Record of Sale archive: handgun type, caliber, barrel length, and country of origin. In addition, sales records provide the age and sex of the person purchasing the handgun, the date the handgun was sold, the county of sale, whether the sale occurred at a gun show, and whether the sale was a private-party transfer. This section of the report summarizes that information.

In these tables, handguns are divided into four types: semiautomatic pistols (referred to hereafter as pistols), revolvers, derringers, and other handguns (single shot and bolt action handguns). Handgun calibers are divided into three groups: small (for example, .22, .25, .32), medium (for example, .38, .380, 9mm), and large (for example, .357, .40, .44, .45, .50). Barrel lengths are categorized here as short (three inches or shorter) or long (greater than three inches). Country of origin is reported as from either the United States or elsewhere.

While the number of handgun sales was highest in urban counties (see page 14; Los Angeles County ranked first with 40,824 sales), the per capita rate of sales was highest in predominantly rural counties (see page 15; Trinity County ranked first at 25.1 sales per 1,000 persons 21 years of age and older).

A total of 193,489 handguns were sold in California in 2000, for a rate of 8.4 handgun sales per 1,000 persons ages 21 and older. Handgun sales fluctuated little from month to month until the end of the year, then increased considerably. Sales ranged from a low of 13,085 in April to a high of 32,979 in December (see page 17).

Sixty-eight percent of handguns sold in California in 2000 were pistols. Large-caliber handguns were the most common (48.6%), and most handguns had long barrels (77.5%). More than one-third of handguns were manufactured outside the United States.

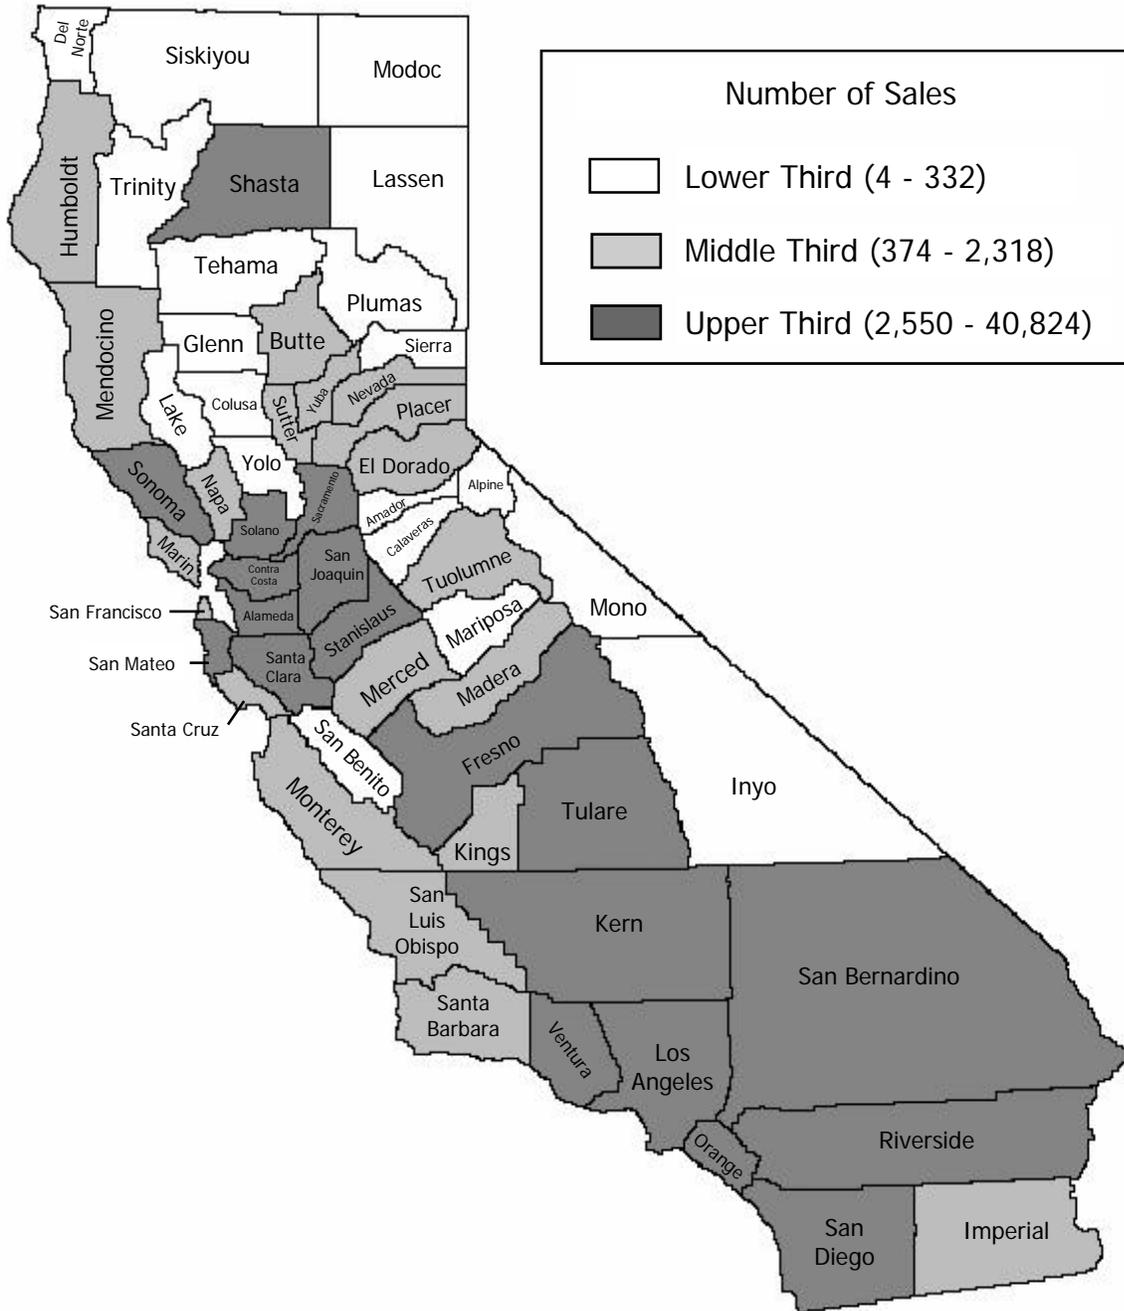

Males bought 92.2% of handguns, and 25.3% were bought by persons ages 35-44.

While the number of handgun sales was highest in urban counties, the rate of sales was highest in predominantly rural counties.

Sixty-eight percent of handguns sold in California in 2000 were pistols. Large-caliber handguns were the most common (48.6%), and most handguns had long barrels (77.5%). More than one-third of handguns were manufactured outside the United States.

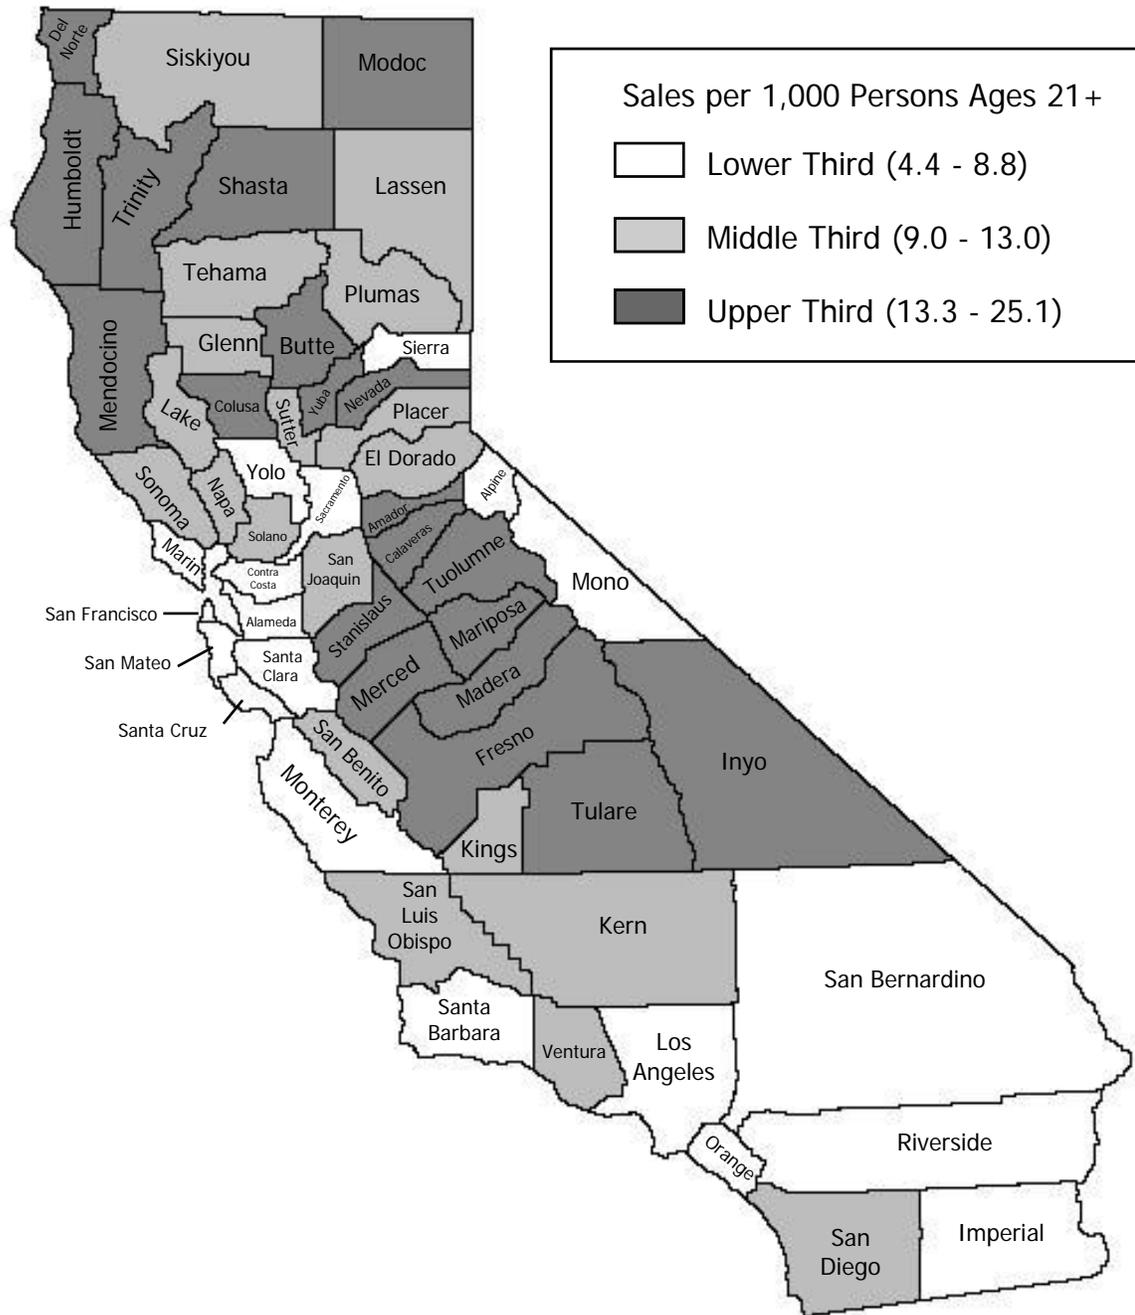

Sales by County

This map summarizes the number of handguns sold in each county in 2000. Counties are ranked by sales and grouped into thirds. These tabulations are of sales by licenses in a particular county and do not necessarily represent sales to residents of that county. Handgun sales counts were highest in urban counties; there were 193,489 sales altogether. See Appendix II for additional details.

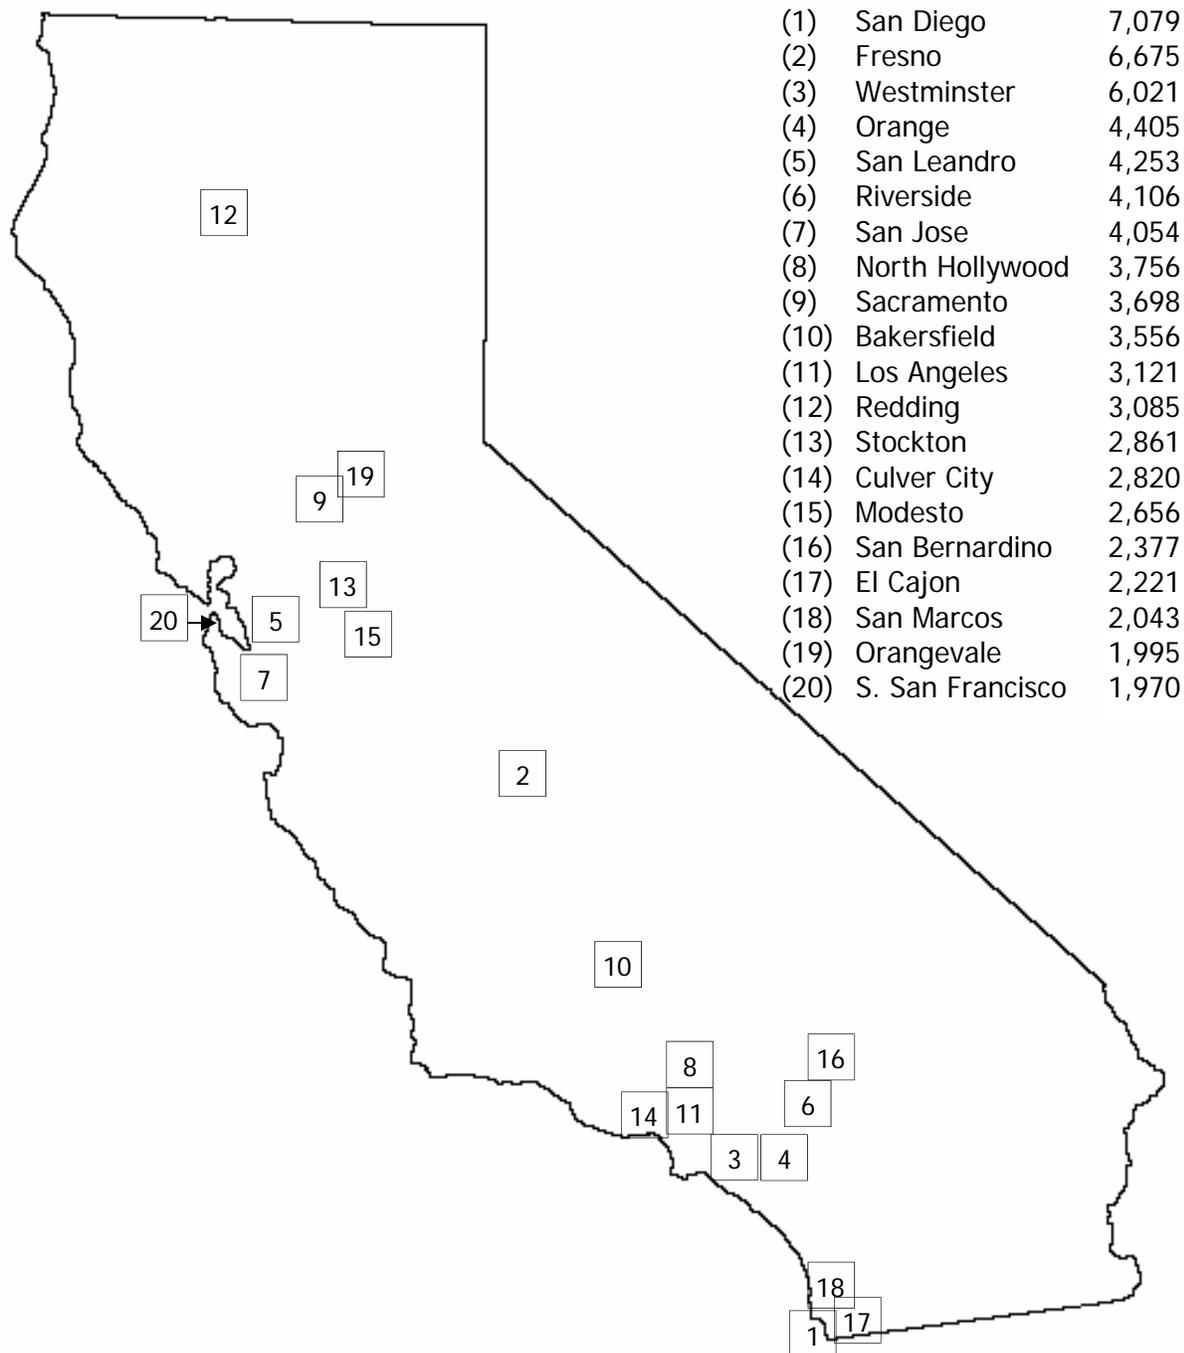

Rate of Sales by County

This map summarizes the rate of handgun sales per 1,000 persons ages 21 and older in each county in 2000. Counties are grouped by sales rate into thirds. These tabulations are of sales by licensees in a particular county and do not necessarily represent sales to residents of that county. The rate of sales was highest in predominantly rural counties; the statewide average was 8.4 sales per 1,000 persons ages 21 and older. See Appendix II for additional details.

Sales by City

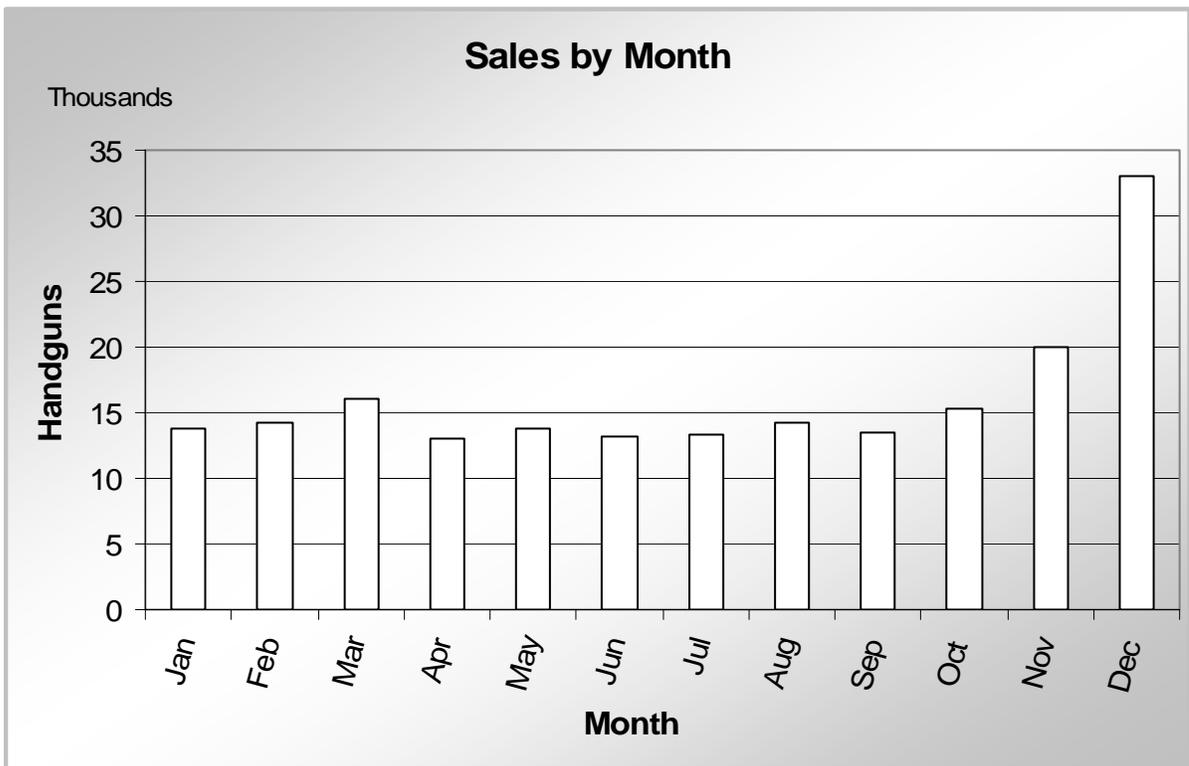

This map identifies the 20 cities with the largest number of sales in 2000. These tabulations are of handgun sales by licensees in a particular city and do not necessarily represent sales to residents of that city. See Appendix II for additional details.

Sales by Month

This table and figure indicate the number of handguns sold each month in California in 2000. Sales ranged from a low of 13,085 in April to a high of 32,979 in December.

<u>Month</u>	<u>Number</u>	<u>Percent</u>
January	13,853	7.2
February	14,297	7.4
March	16,006	8.3
April	13,085	6.8
May	13,721	7.1
June	13,162	6.8
July	13,308	6.9
August	14,266	7.4
September	13,463	7.0
October	15,316	7.9
November	20,033	10.4
December	32,979	17.0

All Handguns

Approximately 68% of handguns sold in California in 2000 were pistols, and 17% of handguns were of small caliber. Most (77.5%) had barrels greater than three inches in length. More than one-third (36.1%) of handguns were manufactured outside the United States.

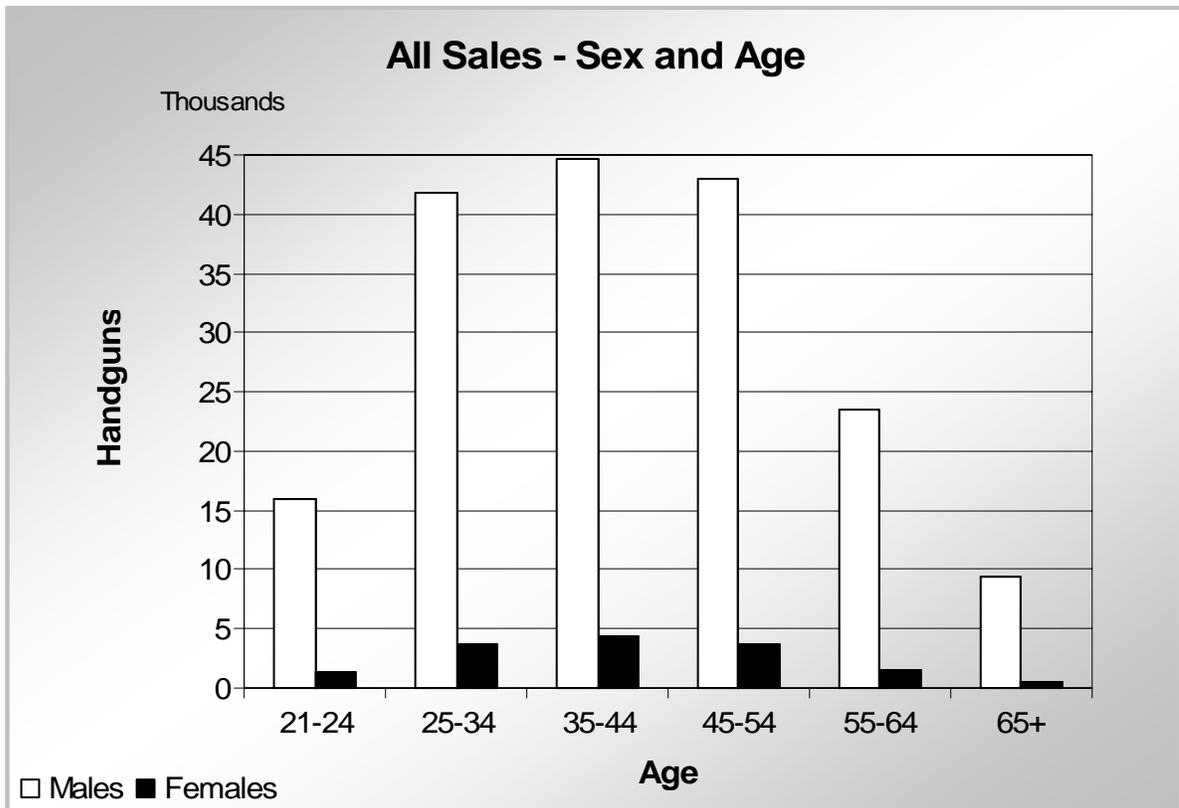

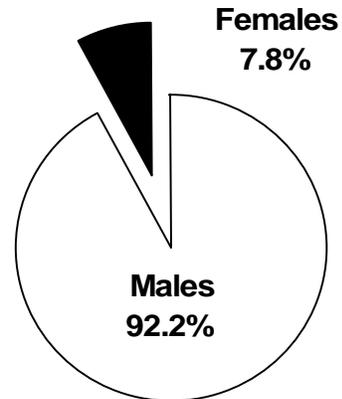

Total Handgun Sales: 193,489

	<u>Number</u>	<u>Percent</u>
<u>Type</u>

All Sales - Sex and Age

Of 193,489 handguns sold, 178,374 (92.2%) were sold to males and 15,112 (7.8%) to females. More handguns were sold to persons ages 35-44 than to persons of other ages. See Appendix I and II for additional details.

<u>Age</u>	<u>Number</u>	<u>Percent</u>
21-24	17,341	9.0
25-34	45,389	23.5
35-44	49,029	25.3
45-54	46,677	24.1
55-64	25,002	12.9
65+	10,042	5.2

Pistols

Pistols made up the majority of handgun sales in California in 2000 (68.4%). Most pistols were of medium caliber (37.9%) or large caliber (43.2%) and had long barrels (82.8%). More than 40% were manufactured outside the United States. See page 3 for a description of a pistol and page 7 for an example.

Total: 132,291

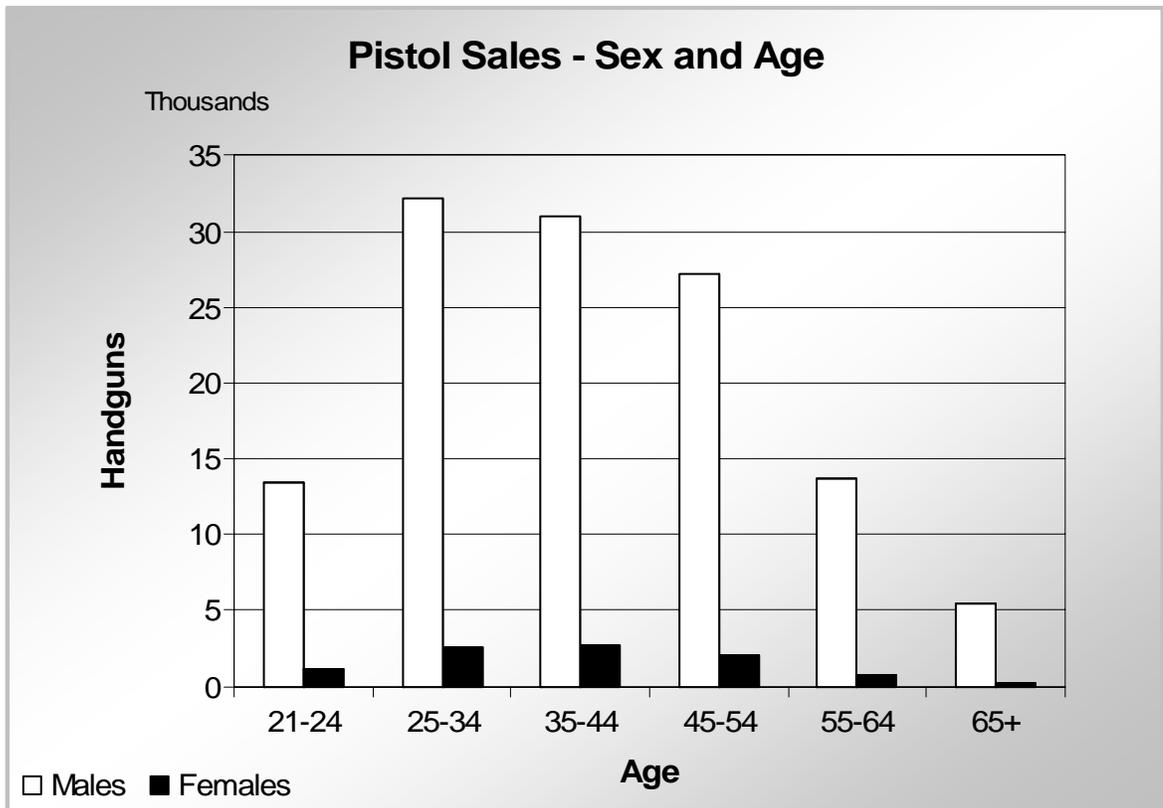

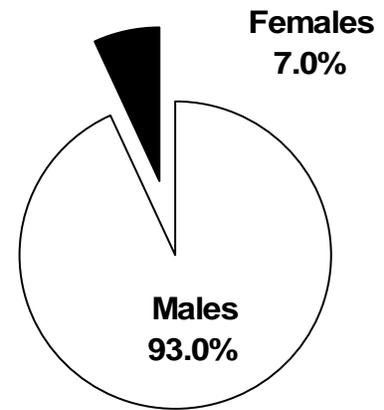

Percent of Handgun Sales: 68.4

Handgun Manufacturers

While handguns from 639 manufacturers were sold in California in 2000, the top 20 manufacturers accounted for 84.1% of all handguns sold. Of these manufacturers, 11 are located primarily in the United States. Several of the remaining top manufacturers operate in the U.S. through subsidiaries. Overall, Smith & Wesson ranked first in handguns sold (34,819 handguns, 18.0%), followed by Sturm, Ruger (28,181 handguns, 14.6%). Together, these two manufacturers produced one-third of all handguns sold.

Sixty-two percent of Smith & Wesson handguns were revolvers; this company was the leading manufacturer of revolvers sold in the state, accounting for 36.9% of all revolver sales. Only 9.9% of their handguns were small-caliber; 38.0% were medium-caliber, and 52.0% were of large caliber. Smith & Wesson was the largest manufacturer of medium-caliber handguns (13,222 handguns, 20.5%) and large-caliber handguns (18,118 handguns, 19.3%) sold in California.

Sturm, Ruger handguns were more evenly distributed between small (26.5%), medium (20.3%) and large (53.1%) calibers. Ninety-five percent of Sturm, Ruger handguns had long barrels. Sturm, Ruger was the largest manufacturer of small caliber handguns sold in California (7,468 handguns, 22.6%).

Glock accounted for 10.2% of all handguns sold and was the largest manufacturer of pistols sold in the state (19,613 handguns, 14.9%). Glock does not produce revolvers or small-caliber pistols. Most Glock pistols were of large caliber (67.0%) and had long barrels (91.2%).

Two of the top 20 manufacturers are headquartered in Southern California. Bryco Arms/Jennings Firearms (Costa Mesa) and Phoenix Arms (Ontario) together accounted for 2,682 handguns sold. All of these handguns were pistols, of small (58.8%) or medium caliber (41.1%), with a short barrel (62.4%). While only producing 1.4% of all handguns sold in California in 2000, these companies accounted for 4.0% of all short-barrel handguns.

Twenty manufacturers produced 84.1% of all handguns sold; 11 of these are located primarily in the U.S.

Smith & Wesson ranked first in handguns sold (34,819 handguns, 18.0%), followed by Sturm, Ruger (28,181 handguns, 14.6%).

Denied Sales

Under federal and California law, firearm purchase and possession are prohibited for a person who has been convicted of a felony, is under felony indictment, is a fugitive from justice, is an unlawful user of or is addicted to a controlled substance, has been adjudicated mentally defective, is an illegal alien, has been convicted of a misdemeanor crime of violence, or is subject to a domestic violence restraining order. California law prohibits persons convicted of certain violence misdemeanors from purchasing or possessing firearms for ten years after they have been convicted. California also prohibits the purchase or possession of firearms by persons who have been admitted to a mental health facility under certain specific circumstances within the preceding five years. Beginning in 2000, California prohibits handgun purchases from firearm licensees in excess of one per month.

There were 3,632 denied sales in 2000: 1,621 prohibited-person denials and 2,011 one gun a month denials. This represents approximately two denied sales for every 100 handguns sold. A total of 3,444 individuals attempted to purchase handguns but were denied; 95.1% of these individuals were denied once, and the remainder were linked to as many as seven denied sales.

Most handguns involved in both one gun a month and prohibited-person denied sales were pistols, three-fourths had long barrels, and nearly two-thirds were of U.S. origin (see pages 62 and 64). Handguns denied to prohibited persons were more likely to be of medium or large caliber (43.1% medium, 43.0% large) than were handguns in one gun a month denials (28.9% medium, 47.8% large).

The majority (94.1%) of both groups of denied sales were to males. Nearly half (46.2%) of the prohibited-person denials were between 21 and 34 years of age compared with 23.3% of the one gun a month denials (see page 63).

The list of manufacturers most frequently involved in denied sales generally resembled the list of manufacturers of handguns that were most frequently sold.

Among prohibited-person denials, 76.8% were for prior criminal convictions: 40.3% for felonies and 36.5% for misdemeanors. Drug-related offenses were the most common felony convictions (29.6%). Nearly all the misdemeanor convictions (83.1%) were for assault.

There were 3,632 denied sales in 2000: 1,621 prohibited-person denials and 2,011 one gun a month denials.

This represents two denied sales for every 100 handguns sold.

Prohibited-Person Denials

Presented are characteristics of handguns for which the prospective purchasers were prohibited persons. These denials accounted for 44.6% of all denials and most (74.0%) were pistols, of medium (43.1%) or large (43.0%) caliber, and of U.S. origin (63.9%).

Reasons for Denied Sales

There were 3,444 persons denied handgun purchase in 2000. For nine persons, more than one reason was given for denial. One gun a month denials were most common overall (55.4%) Drug offenses were most common among felonies (29.6%), and assaults were most common among misdemeanors (83.1%).

Handgun Purchasers

Handgun purchasers must be legal residents of California and be age 21 or older. They must also pass a background check and a safety course.

In 2000, 134,227 Californians purchased 193,489 handguns. The vast majority (90.9%) of these handgun purchasers were male, and more than half (50.4%) were ages 25-34 or 35-44. Most purchasers (77.3%) bought only one handgun; the 22.8% of purchasers who bought more than one handgun accounted for 46.4% of all handguns sold (see pages 72 and 73).

A total of 103,743 people bought one handgun in 2000. Most of these handgun purchasers were male (89.9%), and they were most commonly ages 25-34 (26.3%, see page 72).

A total of 30,484 people bought at least two and as many as 225 handguns in 2000; they bought 89,746 handguns in total. Most of these purchasers were male (94.3%), and they were most commonly ages 35-44 (26.3%, see page 73).

There were 2,031 people who bought more than five handguns in 2000. They accounted for only 1.6% of all purchasers but bought 9.5% of all handguns sold: a total of 18,383 handguns (see page 70).

For male handgun purchasers, those who were 35-44 years old were most likely to buy more than one handgun (26.3%); those 65+ years old were least likely (4.7%). For female handgun purchasers there was little relationship between age and number of handguns purchased (see page 74).

Purchasers and Guns Purchased

Of 134,227 individuals who purchased handguns, 103,743 (77.3%) bought one handgun and accounted for 53.6% of handguns sold. The 30,484 purchasers (22.8%) who bought more than one handgun accounted for 46.4% of all handguns sold.

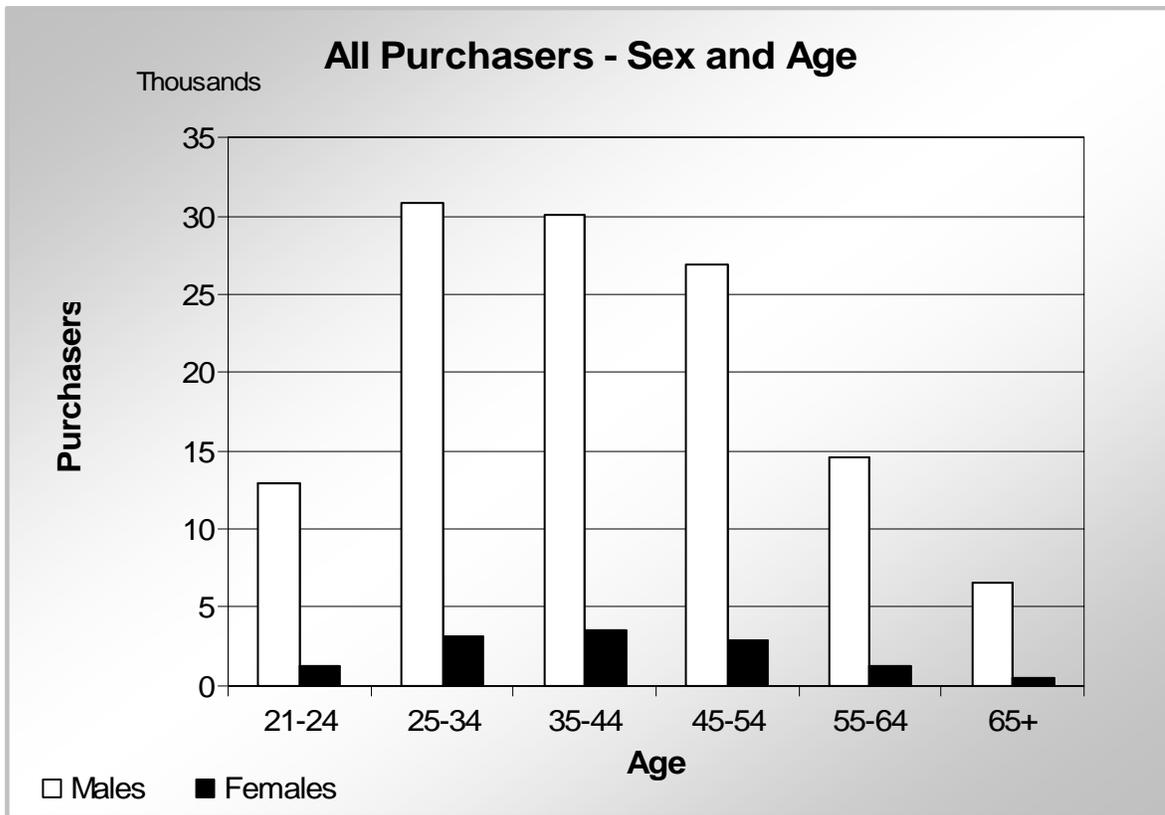

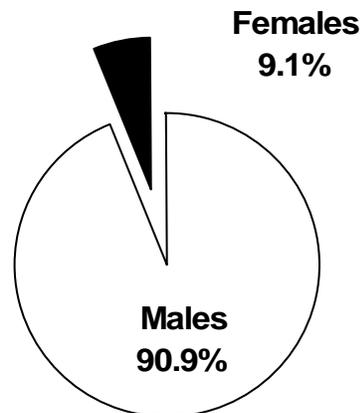

Number of Guns Purchased	Purchasers		Total Guns Purchased	
	Number	Percent	Number	Percent
1	103,743	77.3	103,743	53.6
2-5	28,453	21.2	71,363	36.9
6-12	1,855	1.4	14,053	7.3
13-20	103	0.1	1,561	0.8
21+	73	0.1	2,769	1.4

All Purchasers - Sex and Age

Of 134,227 handgun purchasers, 121,982 (90.9%) were male and 12,242 (9.1%) were female. More persons ages 25-34 and 35-44 purchased handguns than did persons of other ages.

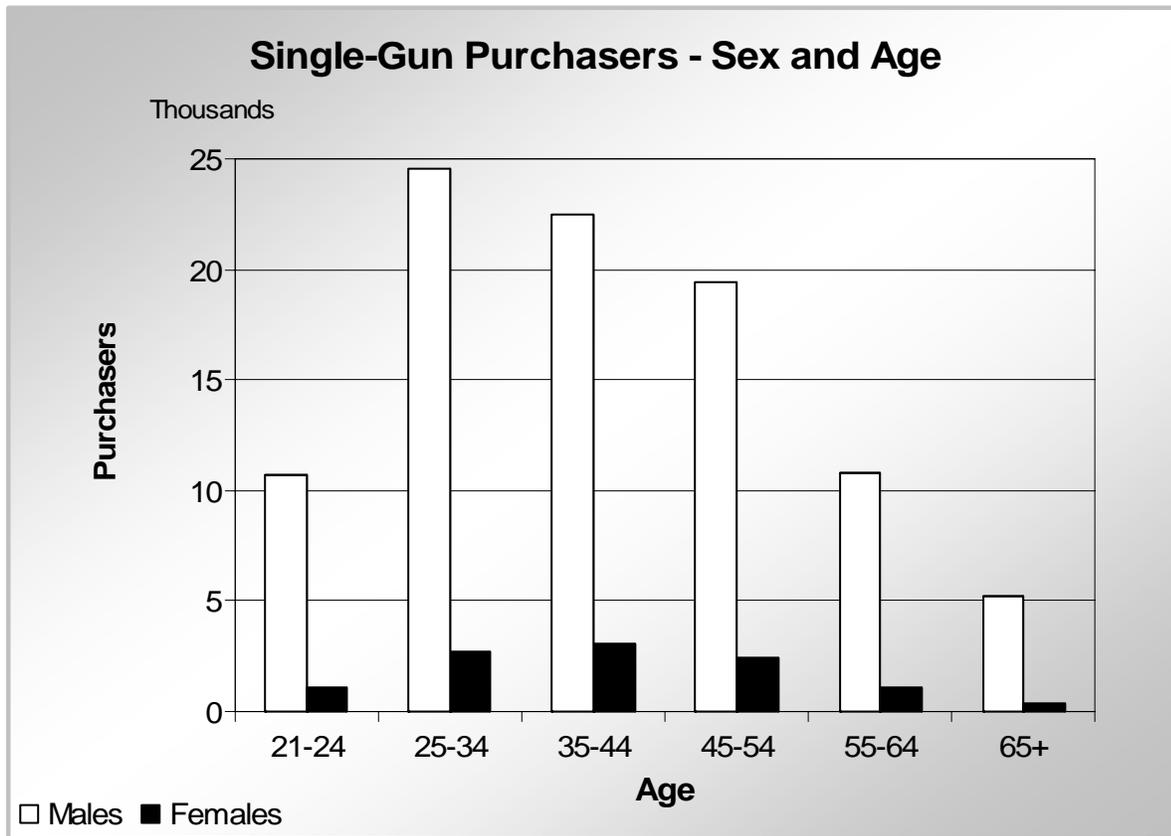

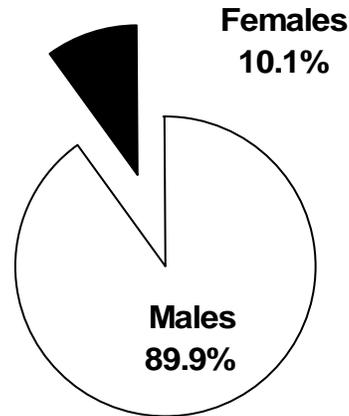

<u>Age</u>	<u>Number</u>	<u>Percent</u>
21-24	14,118	10.5
25-34	34,000	25.3
35-44	33,584	25.0
45-54	29,808	22.2
55-64	15,750	11.7
65+	6,963	5.2

Single-Gun Purchasers - Sex and Age

Of 103,740 purchasers of one handgun, 93,239 (89.9%) were male and 10,501 (10.1%) were female. More purchases of one handgun were made by persons ages 25-34 (26.3%) than by persons of other ages.

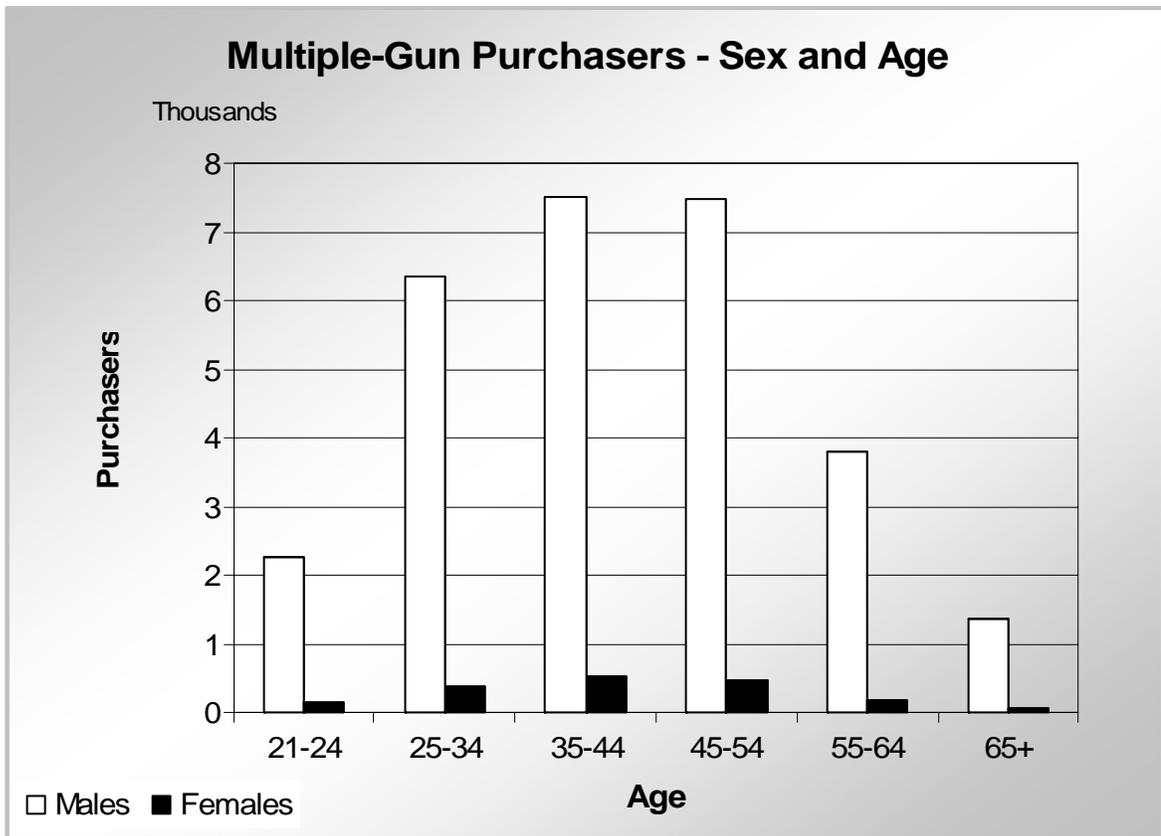

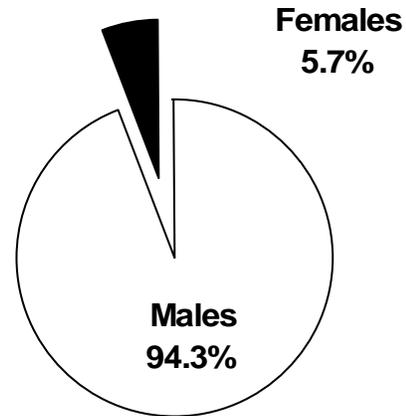

<u>Age</u>	<u>Number</u>	<u>Percent</u>
21-24	11,725	11.3
25-34	27,266	26.3
35-44	25,574	24.7
45-54	21,863	21.1
55-64	11,793	11.4
65+	5,519	5.3

Multiple-Gun Purchasers - Sex and Age

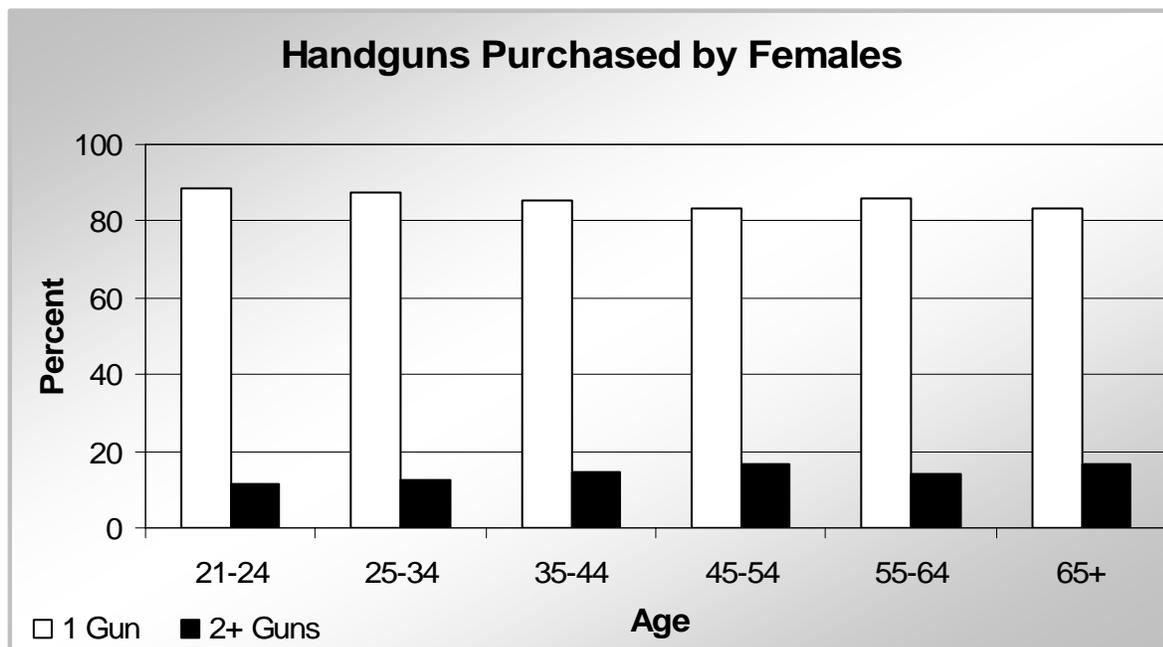

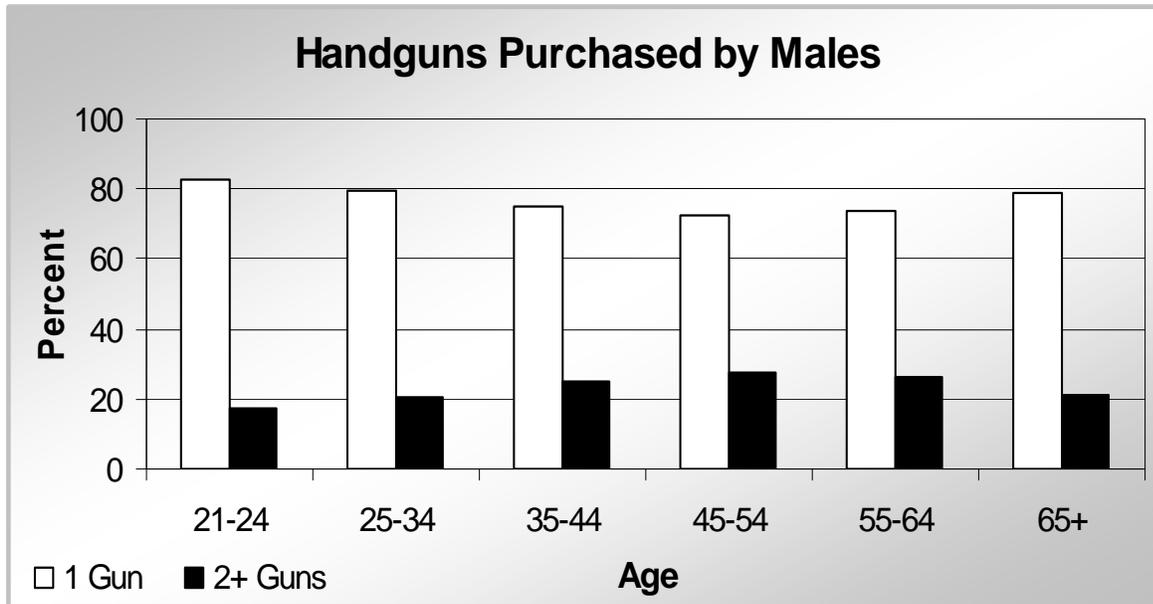

Of 30,484 purchasers of two or more handguns, 28,743 (94.3%) were male and 1,741 (5.7%) were female. More purchases of two or more handguns were made by persons ages 35-44 and 45-54 than by persons of other ages.

<u>Age</u>	<u>Number</u>	<u>Percent</u>
21-24	2,393	7.9
25-34	6,734	22.1
35-44	8,010	26.3
45-54	7,945	26.1
55-64	3,957	13.0
65+	1,444	4.7

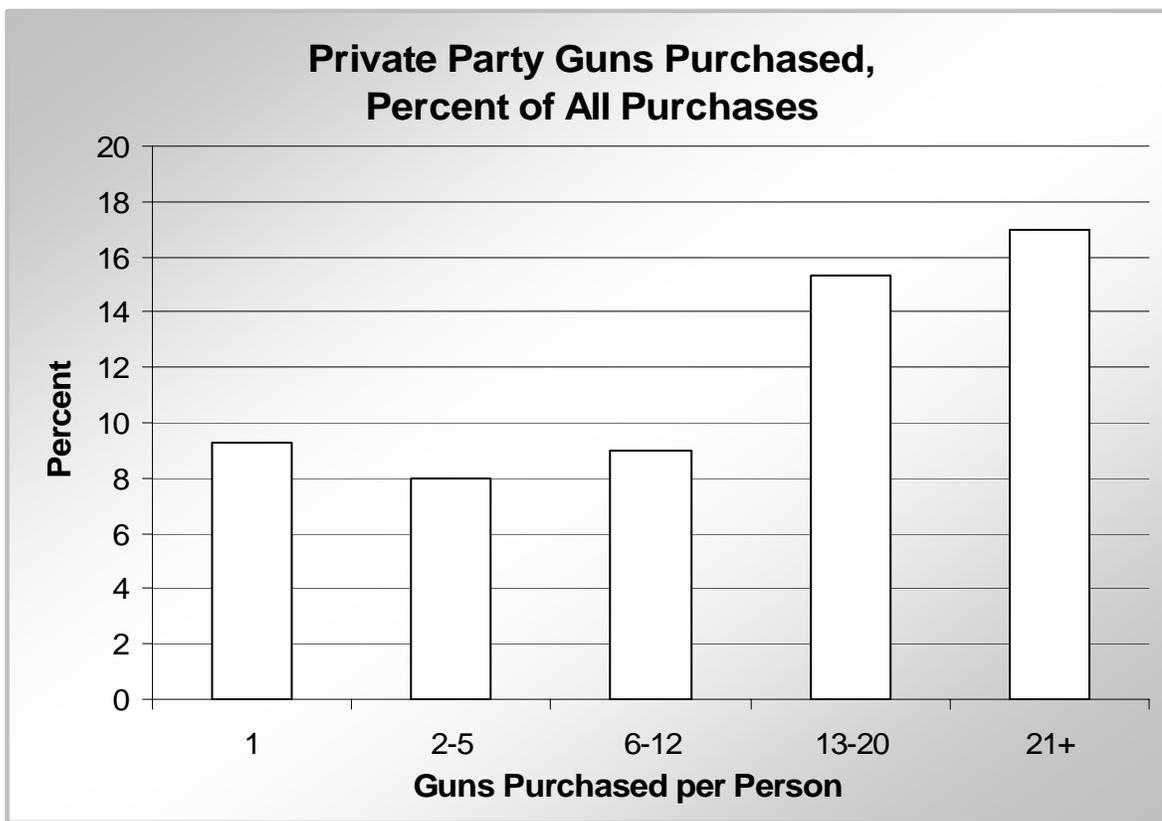

Handguns Purchased by Sex and Age

The proportion of purchasers who bought more than one handgun varied somewhat with age among males and was highest (27.7%) for those ages 45-54. There was little variation among females.

Private Party and Total Purchases

Private party purchases made up less than 10% of all guns purchased by persons who purchased 1, 2-5, or 6-12 handguns, but at least 15% for persons who purchased 13 or more handguns.

Firearm Licensees

Under federal law, a license is required to engage in the business of manufacturing, importing, distributing, or selling firearms or ammunition. California law also requires a state license. This report provides information on the 1,936 firearm licensees who reported handgun sales in 2000. (As of September 1999, there were 6,406 federal firearm licensees in California, including 4,005 gun dealers and 286 pawnbrokers.)

The majority of licensees are in the urban counties of Southern California and the San Francisco Bay area (see page 78; Los Angeles County ranked first with 273 licensees), but the highest numbers of licensees on a per capita basis are found in rural counties (see page 79); Alpine County ranked first with 115.5 licensees per 1,000 persons ages 21 and older.

Gun dealers accounted for 86.2% of licensees and 86.7% of handgun sales; pawnbrokers accounted for 11.7% of licensees and 9.8% of handgun sales (see page 80). Handgun sales were concentrated among relatively few retailers (gun dealers and pawnbrokers). The 94 retailers selling 500 or more handguns accounted for 4.9% of all retailers but 52.1% of sales by retailers (see pages 82 and 83).

Handguns sold by dealers were more likely than those sold by pawnbrokers to be pistols (68.9% and 60.7%, respectively) and to be of large caliber (51.2% and 44.9%, respectively) (see page 81).

Three gun dealers reported sales of more than 3,000 handguns. Of the 20 retailers with the largest numbers of handgun sales, six are branches of Turner's Outdoorsman. Eight are in the Los Angeles area, five in the San Francisco Bay area, two each in Riverside/San Bernardino, the Sacramento area, and San Diego, and one in Fresno (see page 84).

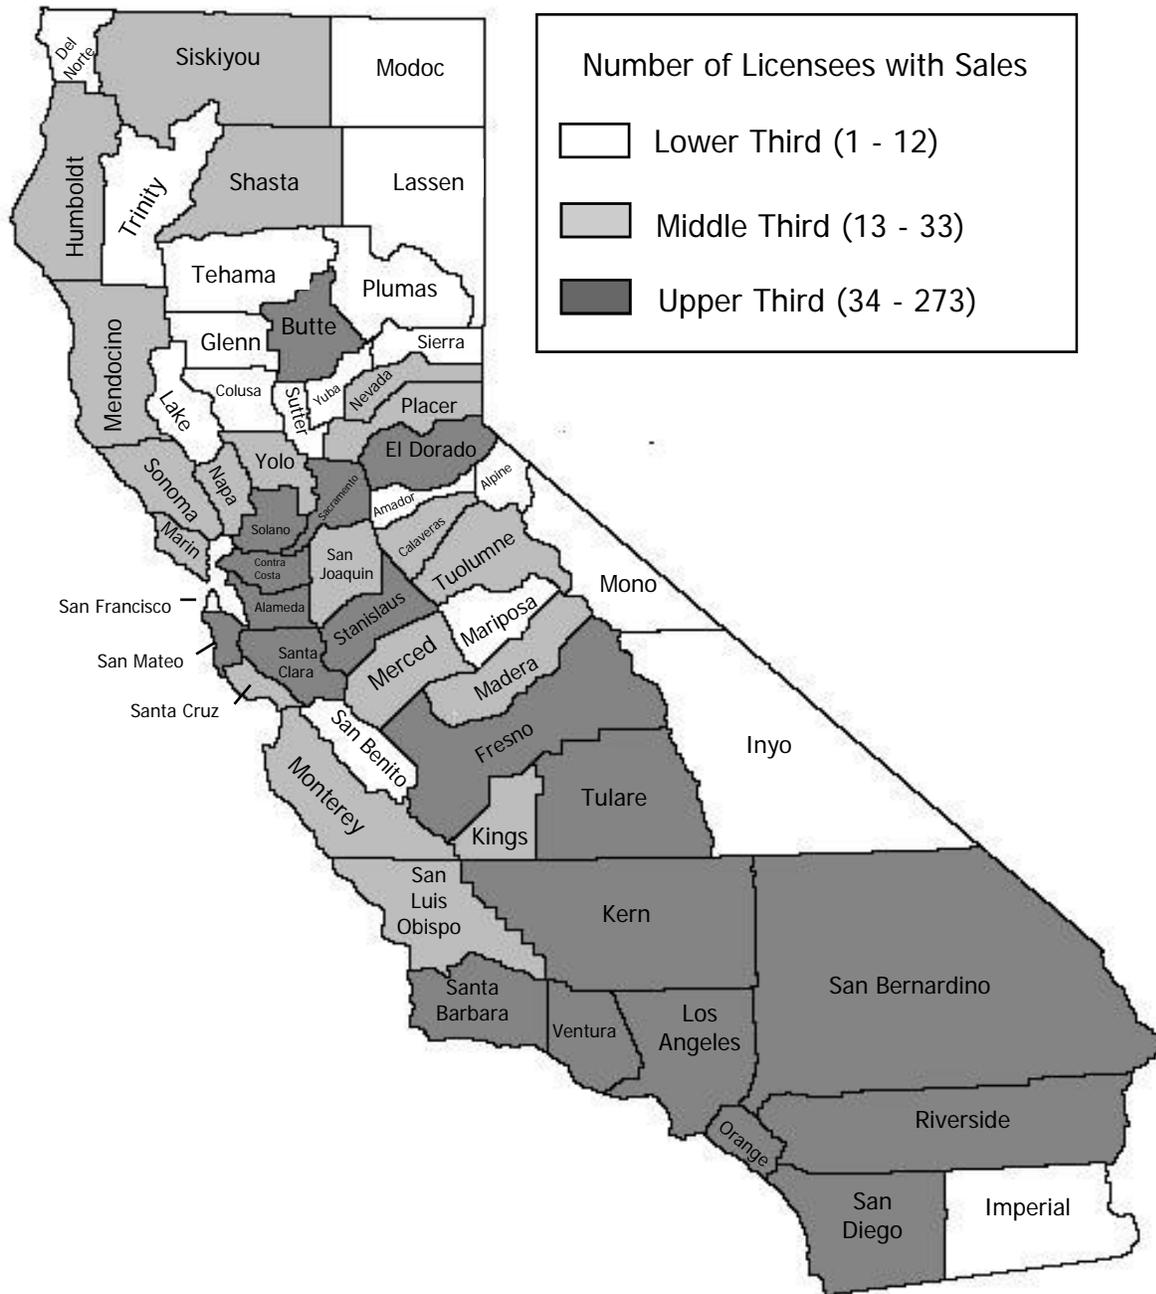

Of the retailers with the largest number of denied sales, about half were also among those with the largest number of handgun sales. For retailers with the most denied sales, denials ranged from 1.4 to 6.4 for every 100 handguns sold (see page 85).

Most licensees are in urban counties, but the highest numbers of licensees per capita are in rural counties.

Gun dealers and pawnbrokers selling 500 or more handguns accounted for 4.9% of retailers but 52.1% of sales by retailers .

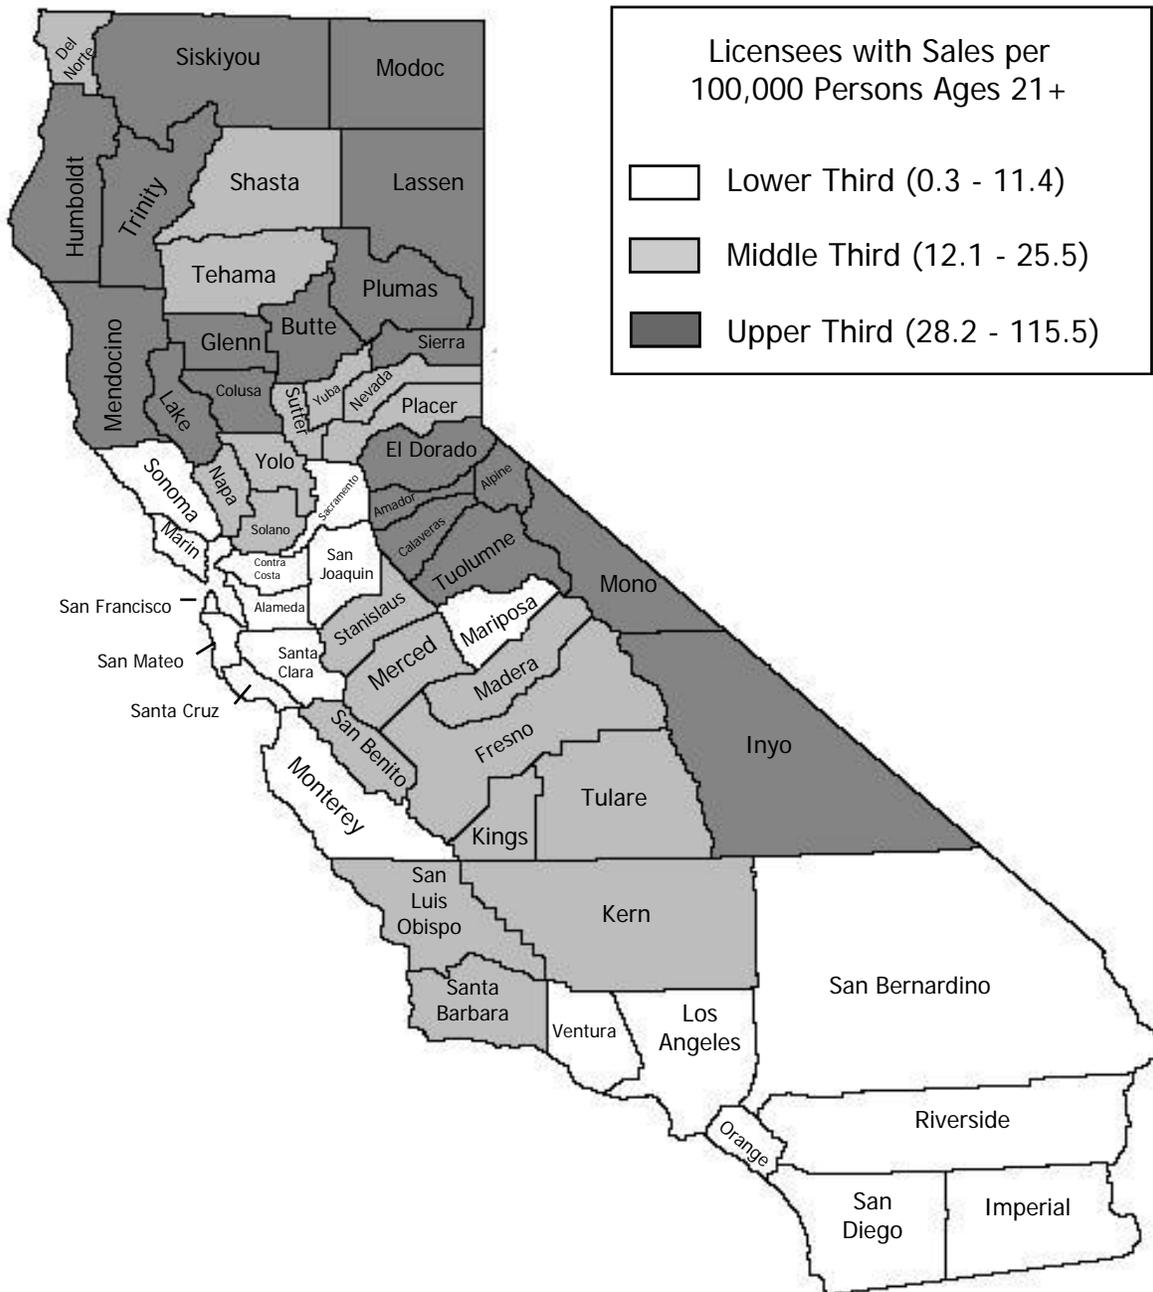

Licensees by County

This map summarizes the number of licensees with handgun sales in each county in 2000. Counties are ranked by number of licensees and grouped into thirds. Licensees are most numerous in urban counties.

Density of Licensees by County

This map summarizes the density of licensees with handgun sales per 100,000 persons ages 21 and older in each county in 2000. Counties are ranked by licensees per capita and grouped into thirds. Licensee density is highest in rural counties; the statewide average is 8.4 per 100,000 persons ages 21 and older.

Licensee Types and Sales

Gun dealers accounted for 86% of both licensees and handgun sales; pawnbrokers accounted for 11.7% of licensees and 9.8% of handgun sales. Pawnbroker sales included 7,837 redemptions from pawnshops.

<u>Licensee Type</u>	<u>Number</u>	<u>Percent</u>
Gun Dealer	1,669	86.2
Pawnbroker	227	11.7
Manufacturer (Firearms)	24	1.2
Importer (Firearms)	16	0.8

<u>Handgun Sales by Licensee Type</u>	<u>Number</u>	<u>Percent</u>
Gun Dealer	167,682	86.7
Pawnbroker	18,863	9.8
Manufacturer (Firearms)	1,185	0.6
Importer (Firearms)	5,759	3.0

Handgun Type and Caliber - Retailers

Handguns sold by gun dealers were more likely than those sold by pawnbrokers to be pistols (68.9% and 60.7%, respectively). There was little difference in caliber distribution; 51.2% of guns sold by gun dealers and 44.9% of those sold by pawnbrokers were of large caliber.

Gun Type by Retailer Type

<u>Gun Type</u>	Gun Dealers		Pawnbrokers	
	<u>Number</u>	<u>Percent</u>	<u>Number</u>	<u>Percent</u>
Pistol	115,587	68.9	11,449	60.7
Revolver	49,610	29.6	7,095	37.6

Appendix III: Technical Notes

This appendix contains technical notes on exclusions and missing data.

This report does not contain information on all handgun sales in California. Some sales between private individuals are not included because there is no record of them: State law requires that all such private-party transfers be routed through a firearms licensee so that a DROS record can be made and a background check can be conducted, but compliance is less than perfect. We have also excluded transactions involving the operations of the Department of Justice itself and certain other transactions. As a result of those exclusions, the sales tabulations here do not agree exactly with those provided by the Department of Justice.

With occasional exceptions, we have elected to use the information in the DROS records as originally provided by the submitting licensees, without reviewing the records and correcting errors. Some licensees did not supply complete data, particularly for handgun caliber and barrel length, and purchaser age and sex. As a result, table subtotals may not correspond exactly with totals.

Missing Information

Page Number	Page Title	Records with Missing Information
18	All Handguns	Type = 4, caliber = 1,905, barrel length = 1,853
19	All Sales - Sex and Age	Sex = 3, age = 6
20	Pistols	Caliber = 1,365, barrel length = 1,349
21	Pistol Sales - Sex and Age	Sex = 2, age = 5
22	Revolvers	Caliber = 80, barrel length = 60
23	Revolver Sales - Sex and Age	Sex = 1, age = 1
24	Derringers	Caliber = 2, barrel length = 2
26	Other Handguns	Caliber = 458, barrel length = 442
28	Small-Caliber Handguns	Type = 1
30	Medium-Caliber Handguns	Barrel length = 1
31	Medium-Caliber Sales - Sex and Age	Sex = 1, age = 2
32	Large-Caliber Handguns	Type = 3, barrel length = 4
33	Large-Caliber Sales - Sex and Age	Sex = 2, age = 4
34	Short-Barrel Handguns	Caliber = 7
36	Long-Barrel Handguns	Type = 4, caliber = 50
37	Long-Barrel Sales - Sex and Age	Sex = 3, age = 6
38	U.S. Handguns	Type = 3, caliber = 1,714, barrel length = 1,683
39	U.S. Sales - Sex and Age	Sex = 2, age = 4
40	Imported Handguns	Type = 1, caliber = 191, barrel length = 170
41	Imported Sales - Sex and Age	Sex = 1, age = 2
42	Gun Show Handgun Sales	Caliber = 40, barrel length = 39
44	Private Party Handgun Sales	Caliber = 95, barrel length = 90
48	Manufacturers - Smith & Wesson	Caliber = 47, barrel length = 43
48	Manufacturers - Sturm, Ruger	Caliber = 27, barrel length = 25
49	Manufacturers - Glock	Caliber = 29, barrel length = 30

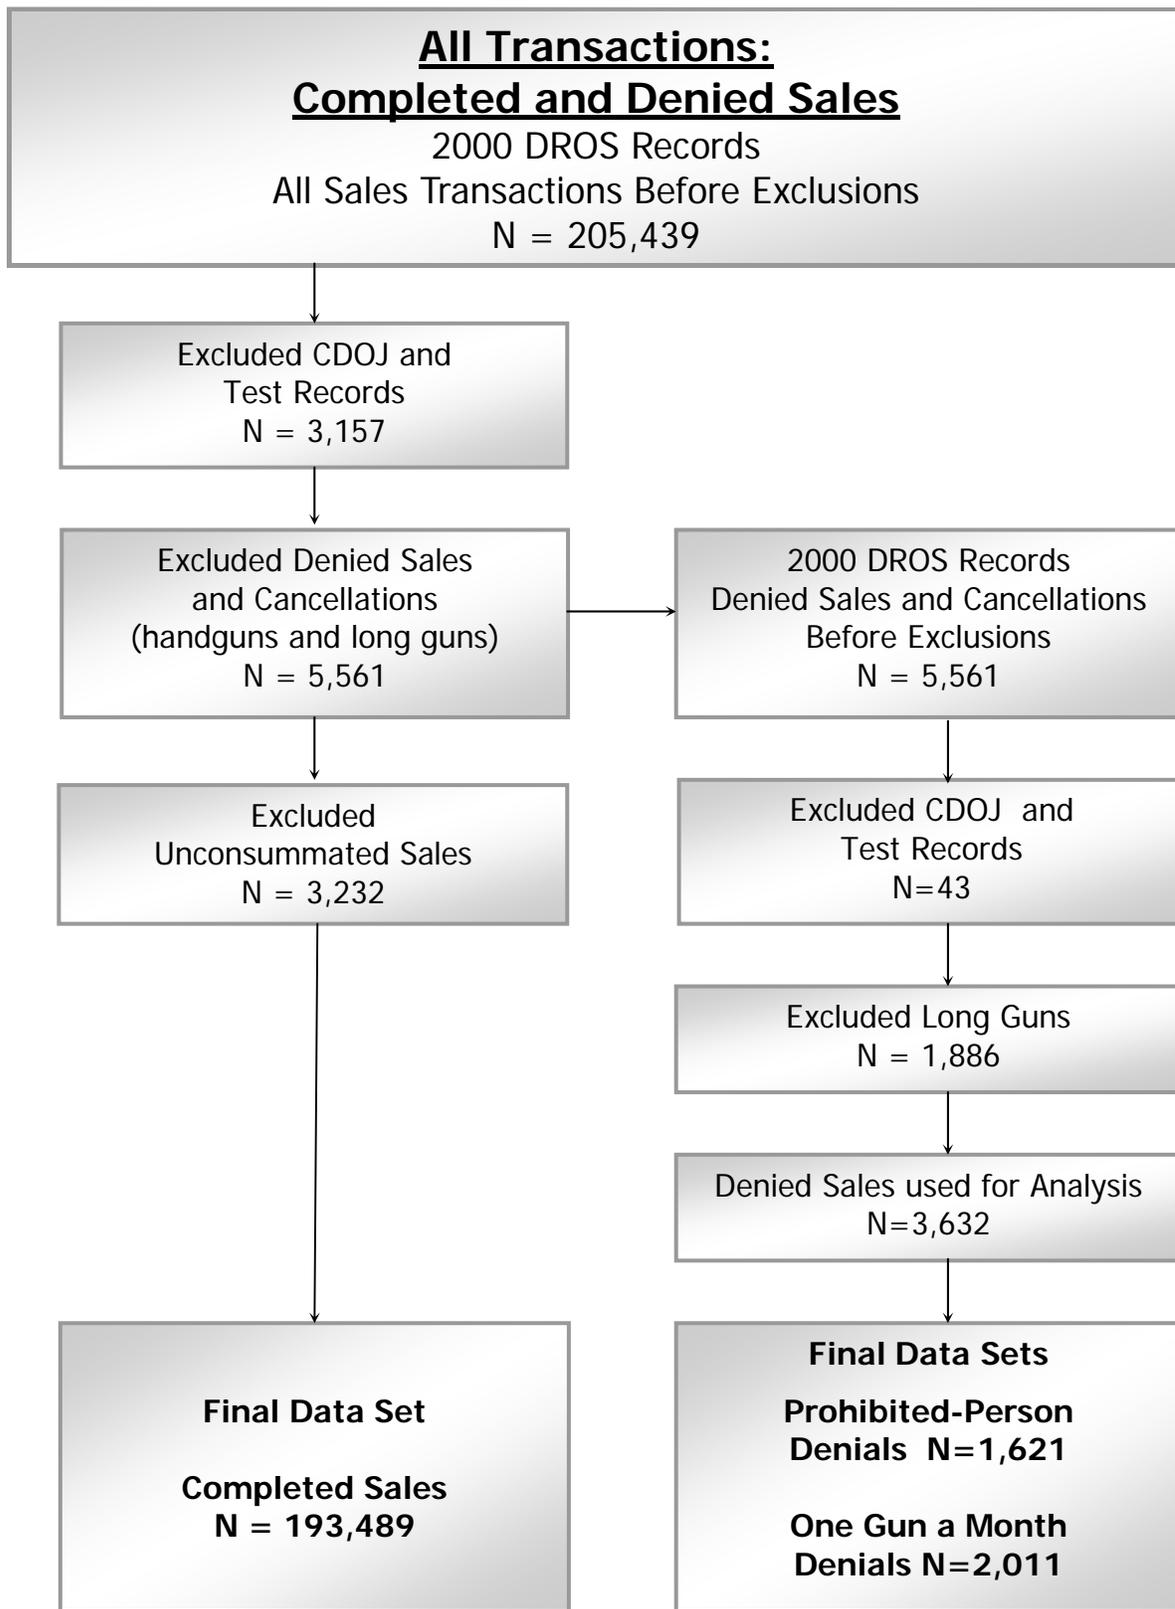

Missing Information

Page Number	Page Title	Records with Missing Information
49	Manufacturers - Beretta	Caliber = 24, barrel length = 22
50	Manufacturers - Colt's Manufacturing	Caliber = 25, barrel length = 24
50	Manufacturers - Taurus	Caliber = 11, barrel length = 8
51	Manufacturers - SIG Arms	Caliber = 17, barrel length = 12
51	Manufacturers - Heckler & Koch	Caliber = 13, barrel length = 13
52	Manufacturers - Kimber	Caliber = 7, barrel length = 8
52	Manufacturers - Walther	Caliber = 3, barrel length = 3
53	Manufacturers - Browning	Caliber = 8, barrel length = 8
53	Manufacturers - Springfield Armory	Caliber = 12, barrel length = 12
54	Manufacturers - Kel-Tec	Caliber = 1, barrel length = 2
54	Manufacturers - North American Arms	Caliber = 2, barrel length = 2
55	Manufacturers - Para-Ordnance	Caliber = 41, barrel length = 41
55	Manufacturers - Bryco/Jennings	Caliber = 2, barrel length = 2
56	Manufacturers - Rossi	Caliber = 3, barrel length = 3
56	Manufacturers - Magnum Research	Caliber = 3, barrel length = 2
57	Manufacturers - Phoenix Arms	Caliber = 1, barrel length = 1
62	Prohibited-Person Denials	Caliber = 3, barrel length = 3
64	One Gun a Month Denials	Caliber = 24, barrel length = 22
67	Reason for Denied Sales	Denial type = 1
71	All Purchasers - Sex and Age	Sex = 3, age = 1
72	Single-Gun Purchasers - Sex and Age	Sex = 3
73	Multiple-Gun Purchasers - Sex and Age	Age = 1
74	Handguns Purchased by Sex and Age	Age = 1
81	Handgun Type and Caliber—Retailers	Type = 23, caliber = 1,828

Missing Information

Page Number	Page Title	Records with Missing Information
90-91	Table 1: Handgun Sales, Denied Sales, and Purchasers by Sex and Age	A combined table—see missing information for pages 18-41, 62-64 and 71-73 on pages 122-123.
92	Table 2: Handgun Characteristics by Manufacturer	A combined table—see individual manufacturers missing information for pages 48-57 on pages 122-123.
94	Table 4: Sales Transactions at Retailer Locations: Handgun and Purchaser Characteristics	<u>Sales Type</u> Loan: Caliber = 1, barrel length = 1 Pawn Redemption: Caliber = 6, barrel length = 6 Private Party: Caliber = 88, barrel length = 84 Retailer: Type = 4, caliber = 1,770, barrel length = 1,723 Purchasers: Pawn Redemption: Sex = 1 Retailers: Sex = 2, age = 6
95	Table 5: Sales Transactions at Gun Shows: Handgun and Purchaser Characteristics	<u>Sales Type</u> Private Party: Caliber = 7, barrel length = 6 Retailer: Caliber = 33, barrel length = 33
96	Table 6: Private Party Sales and Direct Retailer Sales: Handgun and Purchaser Characteristics	Private Party: Caliber = 95, barrel length = 90 Direct Retailer: Type = 4, caliber = 1,810, barrel length = 1,763 Sex = 3, age = 6
97	Table 7: Prohibited-Person and One Gun a Month Denials: Handgun and Purchaser Characteristics	Caliber = 27, barrel length = 25
98	Table 8: Purchasers and Number of Guns Purchased and Purchaser Characteristics	All: Age = 1, sex = 3 Single: Sex=3 Multiple: Age = 1
102 –103	Table 10: Characteristics of Handguns Sold by Firearms Licensees in each County	Type= 4, caliber = 1,905, barrel length = 1,853
104-105	Table 11: Characteristics of Handguns Sold to Resident of Each County	Type = 4, caliber = 1,905, barrel length = 1,853
106-107	Table 12: Handgun Sales by Firearms Licensees in Each County, Sex and Age	Sex = 3, age = 7
108-109	Table 13: Handgun Purchases by Residents of Each County, Sex and Age	Sex = 3, age = 6
116-117	Table 17: Characteristics of Handguns Sold for 56 Cities with Total Populations Greater than 100,000 Persons in 2000	Type = 2, caliber = 662, barrel length = 646
118-119	Table 18: Handgun Sales by City, Sex and Age, for 56 Cities with Total Populations Greater than 100,000 in 2000	Sex = 1, age = 4

2000 DROS Exclusions

Appendix IV: Additional Resources

The Firearms Division of the California Department of Justice maintains a uniquely informative and useful Web site at

<http://caag.state.ca.us/firearms>

Electronic documents and other resources at that site include, among many others:

California Firearms Laws

(a summary of the state's laws governing commerce in and the possession and use of firearms)

Dangerous Weapons Control Laws

(the full text of relevant statutes)

Firearms Division Regulations

Roster of Handguns Certified for Sale

Roster of Approved Firearms Safety Devices

All these documents are updated regularly. Documents are also available from the Division at:

California Department of Justice
Firearms Division
P.O. Box 820200
Sacramento, CA 94203-0200

Appendix IV: Additional Resources

The federal Bureau of Alcohol, Tobacco, Firearms and Explosives also maintains an excellent Web site at: <http://www.atf.gov>

Recent documents available at that site include:

Annual Firearms Manufacturing and Export Report

(released each Spring, containing information on firearms produced by each licensed manufacturer in the United States)

Commerce in Firearms in the United States February 2000

Commerce in Firearms in the United States, 2001/2002

Document No. ATF P 9000.4

Crime Gun Trace Reports 2000—National Report July 2002

Crime Gun Trace Reports 2001-2002—National Report Forthcoming

Federal Firearms Regulations Reference Guide, 2000 Edition Document No. ATF P 5300.4

Following the Gun: Enforcing Federal Laws against Firearms Traffickers
June 2000

Gun Shows: Brady Checks and Crime Gun Traces January 1999

Safety and Security Information for Federal Firearms Licensees Document No. ATF P 3317.2

State Laws and Published Ordinances—Firearms
24th Edition Document No. ATF P 5300.5
